PREFACE

Child Help Foundation (CHF) is a Pan-India non-profit organization working towards empowering the poor and marginalized communities. We have been working across India to successfully provide humanitarian aid to the needy over the last 12 years. This annual report marks all the endeavours of Child Help Foundation in the financial year 2022-2023.

Child Help Foundation is proud of the various contributions it has made to help the country recover post-pandemic. The organization has been battling, not only to support and save the lives of underprivileged children and their families in need but also the helpless strays who have been affected due to their circumstances like poverty, natural calamities etc.

Throughout the financial year of 2022-2023, Child Help Foundation joined hands with volunteers, NGOs, Donors, Corporates, Government Bodies etc to reach its goals. We would like to express our gratitude to all of them.

Child Help Foundation is mainly a child-centric organization. In order to have a better future, it is important for a child to be healthy and educated. To stress the importance of the aforementioned, the

organization has selected 'Swastha se Shiksha Tak' as the theme for this year.

Every child is an untapped potential, waiting for an opportunity. While children with financially stable parents tend to do well in their lives, many underprivileged children are left behind due to the lack of resources. Ill health and lack of educational opportunities severely hamper their future. Hence it is essential that underprivileged children be given a boost in life so that they can compete with their peers.

Child Help Foundation has made efforts to reduce this power dynamic between the underprivileged and privileged by helping children with education, scholarships, emergency medical resources, nutritional meals etc. We plan to help more children in our upcoming years.

Swastha se Shiksha Tak (स्वास्थ्य से शिक्षा तक)

"Education is teaching our children to desire the right things"- said Plato; the ancient Greek philosopher, and he was right as each child is filled to the brim with untapped potential. They have the power to raise their family from ashes to the moon. However, these talented children are often neglected due to various factors.

One of the most gruesome factors is life-threatening diseases. With medical rates at an all-time high, most families empty their entire treasury to raise money for their child's treatment. This often causes neglect in education or causes them to drop out of their schools.

However, neglecting a child's education can lead to harmful results. It can cause the child to be trapped in an inescapable cycle of poverty, which has smeared countless people in this nation.

Therefore, Child Help Foundation has started an initiative called 'Swastha Se Shiksha Tak'. This program will help children who have received assistance from the organization under its 'Emergency Medical Support' to smooth transition back to their classrooms.

Throughout the year, we have helped **521** people battle critical illnesses and helped **31,991** lactating mothers with our baby feeding centres. **17,726** minds were impacted through our activities related to

good health and well-being. **6,57,000** children were served nutritious meals, and **13,333** children were given access to **Quality Education**.

The program will ensure that no child has to give up on their education due to their illness or poverty. Child Help Foundation believes that education is a basic and the most important right of a child, and we are committed to providing help to the children who are lacking.

To leave no child behind, we plan to expand our reach and hope to help out children in every corner of India.

OUR FOUNDERS & TRUSTEES

RAJENDRA PATHAK SUNIL VARGHESE JUGENDER SINGH

We would like to extend our deepest gratitude to everyone who has made the year 2022–23 a resounding success. Our words will never be enough to express how grateful we are for the efforts of all the volunteers, partner NGOs, workforce, and sponsors. From the inception of Child Help Foundation, our goal was to help as many people as possible. And with twelve years of hard work, we have touched the lives of 41,08,814 people all over India.

With our primary goal of investing in children, we have indirectly helped the future of our country. We hope that these children go on to achieve bigger things in life and contribute to the success of our country. With a new year approaching, we hope to bring smiles to more faces across India.

We are committed to assisting United Nations (UN) with achieving its Sustainable Development Goals (SDGs). We are

dedicated to ensuring that by 2030, everyone in India can enjoy peace and prosperity. Giving back to the community, helps us fulfil the goal set by United Nations. We are positive that with the help of our corporate sponsors, individual donors, advisory team, workforce, and volunteers, our dreams will come to fruition as soon as possible.

In the coming years, we plan to bring our ray of positivity to more people and increase our pool of help. We will work our best in hopes of helping as many people as possible. We appreciate each and everyone for all your blessings and support throughout our journey, your selfless efforts were extremely important in helping us reach our goal.

FROM THE DESK OF THE EXECUTIVE DIRECTOR

Children are beaming with untapped potential, and investing in them can change our nation for the better. When a child gets educated, he uplifts his family and nation along with him. Yet, poverty and illness go hand in hand, and a child's education can come to a sudden halt due to critical illness. These illnesses destroy years of progress that child has worked hard for, and it is during this time that they need our help.

Throughout the year 2022-23, we have done our best to provide for as many children as possible. We hope to increase this number, in the coming years, and also to work in new ventures.

In the financial year 2022-23, our network of donors, volunteers and workforce worked round the clock for our philanthropic efforts. Resulting in 84,611 lives being impacted through our 'Emergency Medical Support' program, which includes beneficiaries from emergency medical cases, baby feeding centres, and other activities related to good health and well-being.

We have made sure that **6,57,000** people sleep with full bellies, and through our WAS (Water and Sanitation), we made a positive impact on the lives of **99,233** people, which covers menstrual health, toilet construction, installation of water purifiers and other activities. **13,333** children won't have to worry about education thanks to our various programmes in the 'Quality Education' initiative. **1,824** people were helped during disasters that engulfed the nation, and the lives of **1,334** villagers were made better in the annual year. In our efforts to bridge the gender gap, we reached out to **2,717** people.

Not content with catering to the human population, Child Help Foundation also worked for our voiceless friends. **334** plants and animals were served through our 'Life on Land' initiative, and over **54,346 kgs** of garbage were collected from various beaches throughout India, which saved the lives of **16,30,380** marine species, with the help of our friends at Beach Army.

Health and Education go hand-in-hand when it comes to a child's future. Without good health, a child cannot hope to do well in education and vice-versa. I am extremely proud of the efforts taken by Child Help Foundation in not only delivering quality education to our beneficiaries but also making sure that they remain in good health.

I am optimistic that in the future, we will expand our pool of beneficiaries, and impact more lives in the process.

JIJI JOHN
EXECUTIVE DIRECTOR

FROM THE DESK OF THE CEO

Dear Supporters, On behalf of Child Help Foundation, I extend my heartfelt gratitude to each and every one of you for your unwavering support over the years. Your commitment and dedication have been instrumental in our mission to uplift the underprivileged segments of society.

We have always strived to improve society through our activities and campaigns. Our core belief is that every individual, regardless of their background, deserves access to quality education, healthcare, and a safe place to call home.

Throughout our journey, we have faced numerous challenges, but with the collective efforts of our dedicated team, we have overcome them all. I truly believe and follow that 'Humanity is our religion' and henceforth work to ensure an educated, healthy and sustainable future for the weaker section of society, and build a better tomorrow for today's children.

Since the establishment of our organization, thanks to our donors, partners, and volunteers we have been able to support **2,879** medical emergency cases and also provide education to **4,82,051** children across the country.

Even after all these years, we still see this as only the beginning and expect to continue helping change people's lives in the years to come. We are doing everything we can to make sure that everyone in the country who is less fortunate has access to the essentials of life. Without your crucial and kind help, Child Help Foundation couldn't do everything.

The activities that have made the children and their families smile are highlighted in this year's Annual Report. Their joy and support give us the drive and assurance to change these kids' lives and prepare them to be responsible citizens of the nation.

It brings me great pleasure to share with you some amazing stories about how beneficiaries' lives have been transformed. As a team, Child Help Foundation embraces the opportunity to do our part and improve the lives of those in society's underprivileged groups. We really appreciate everyone who has supported us on this journey, and with your aid, we can make these individuals happy and work towards a brighter future for them.

SHAJI VARGHESE
CEO

OBJECTIVES AND ACTIVITIES

SDG3- Health and Wellbeing of all Children

Child Help Foundation works to save the lives of kids who struggle with life-threatening conditions like childhood cancer, heart disease, and organ failure. We make sure that these kids get recovered swiftly and live healthy lives. Child Help Foundation provides these children with proper care and treatment in hospitals. As of today, with our efforts, we could save **2,879** critically ill children with the best possible treatment and utmost care.

2,879 Children Treated

56,615 Nursing Mothers

25,117 People Reached

SDG 4 - Promoting Inclusive Quality Education

Education empowers children, thus Child Help Foundation aspires to provide inclusive quality education to underprivileged children hence making them compassionate and responsible individuals of society. Child Help Foundation has positively impacted the lives of **4,82,051** children.

4,82,051 Children Educated

OBJECTIVES AND ACTIVITIES

SDG 2 – Let no child die of starvation, striving for Zero Hunger

Child Help Foundation works to reduce malnutrition among children and individuals, particularly in rural and urban regions. As a result, nutrition will gradually increase while child mortality will decline. Through Child Help Foundation's Zero Hunger Programme, **20,01,457** children have received assistance.

1,800 Daily Meals

20,01,457 Children Fed

SDG 5 – Standing up for Gender Equality

Child Help Foundation has put forth a lot of effort to support girls' education. Our educational initiatives prioritise providing boys and girls with equal access to opportunities and education in a setting that is gender inclusive. The LGBTQ community is also supported and served by Child Help Foundation. Under the Gender Equality program, we have reached almost **3,06,820** individuals.

3,06,820 Educated on Gender Equality

OBJECTIVES AND ACTIVITIES

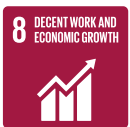

SDG 6 – Ensuring Access to Clean Water and Sanitation

Child Help Foundation has been working towards providing clean toilets and raising menstrual awareness. Child Help Foundation has built toilets for **11,366** children in various schools and supplied sanitary pads to **55,831** beneficiaries. As of today, **99,133** individuals have benefited from our programme for Clean Water and Sanitation (WASH).

55,931 Girls Got Sanitary Pads

11,366 People Got Access to Toilets

15,845 People Got Access to Clean Drinking Water

SDG 8, 10 – Village Development

In Gulabigaon (Bhintghar community), Nashik, Maharashtra, Child Help Foundation started a community development project last year called Bazaarhaat. With the setting up of several shops in the business hub, people can start their own businesses and earn a livelihood. Additionally, the project also provides training and skill development programs to open up more employment opportunities. **2,127** beneficiaries benefitted from this activity.

2,127 People Reached Out To

OBJECTIVES AND ACTIVITIES

SDG 14 – Life Below Water

Since marine species are one of the most crucial component of the ecosystem, it is essential that we as humans protect them. Since 2019, Child Help Foundation has conducted frequent beach clean-up activities. With the help of our volunteers, we were able to collect plastics and other trash from the beaches in Maharashtra state like Velankanni, Gorai, Manori, and Juhu. Child Help Foundation has saved the life of more than **2 crore** marine species.

2,08,77,780 Marine Lives Saved

SDG 15 – Life on Land

CHF believes in improving the lives of all, including stray animals; thus aligning with the SDG 15 Goal of UN, CHF conducts feeding drives of animals.

Child Help Foundation took up the initiative to feed stray animals across various locations in India partnering with 'Street Animals'. Child Help Foundation still continues to provide food to **56,936** animals.

56,936 Animals and Trees

OBJECTIVES AND ACTIVITIES

SDG 11, 13, 17 - Humanitarian Relief

During natural disasters, Child Help Foundation and its volunteers have been leading the way. Our team has helped **11,32,515** victims in need around the nation who have been impacted by the flood's destruction.

Emergency Medical Support 521

GOOD HEALTH & WELL BEING

Emergency Medical Support

The United Nations SDG 3: Good Health and Well-Being aim to promote health care at its best and ward off unnecessary suffering due to preventable diseases and premature death. According to the latest World Health Organisation report, poor health care is accountable for between 5.7 and 8.4 million deaths annually in low- and middle-income countries (LMICs). This number accounts for up to 15% of all deaths in these countries.

The goal is envisioned as increasing the life expectancy of millions of people and reducing the mortality rate by strengthening the primary health care system, focusing on maternal and newborn health, and prioritizing mental health.

Child Help Foundation has adopted SDG3 and made Emergency Medical Support the organisation's flagship program. Under this program, we provide healthcare facilities to children aged 0-18 and save as many lives as possible.

Treatment for heart defects, spine deformities, kidney transplants, liver transplants, stem cell transplants, prolonged NICU treatment for newborns, chemotherapy, and any other long-term treatment needs a lot of financial support. Child Help Foundation helps families in treating their children with these and any other medical treatment they need. We believe that good health paves the way for all things progressive, even education. Children in the best health can avail of education and lead successful career.

To date, we have provided Emergency Medical Support to 2,879 children, and the journey of bringing smiles through medical support continues.

Childhood Cancer

Childhood cancer is a cancer that affects children and adolescents. It is a diverse group of diseases characterized by the abnormal growth of cells in various parts of the body. Although childhood cancer is relatively rare compared to cancer in adults, it remains a significant health concern worldwide. The exact causes of childhood cancer are often unknown, but certain genetic and environmental factors may contribute to its development. Timely diagnosis is vital for improving outcomes. The treatment plan, stage of cancer, and supportive care services play an essential role in managing side effects and providing psychosocial support to children and their families.

Child Help Foundation collaborates with doctors and hospitals to provide cancer treatment for children. With our network of 31 specialized cancer treatment hospitals, we receive referrals from these institutions when low-income group of patients are unable to cover their treatment expenses. With the help of our resource mobilisation team, we actively fundraise for the treatment. Moreover, we leverage social media networks to raise awareness and gather financial support through targeted advertisements.

In the past year, we provided support to 26 children battling cancer. The collaborative efforts of our medical social workers (MSWs), hospitals, and the Parent Connection program with Child Help Foundation have played a crucial role in supporting pediatric cancer patients, and instilling hope in their fight against the disease.

GOOD HEALTH & WELL BEING

The year 2022 - 2023 marks 12 years of Child Help Foundation serving the children suffering from terminal illnesses. This year, we helped 26 children suffering from Cancer. Treatment for Cancer diagnosed in childhood significantly improves their chances of survival. The Medical Social Workers (MSWs), the Hospital, and the Parent Connection with Child Help Foundation have exceptionally helped the Paediatric Cancer patients, illuminating hope in their fight against the disease.

Referral Systems

Child Help Foundation works through referral systems which means that the Medical Professionals or Social Workers at our Partner Hospitals refer these children to us. When a child is diagnosed with cancer, parents are often shocked and on top of it, they are faced with the challenging task of raising the funds for their child's expensive treatment. Our organization thus provides financial aid and emotional support in the form of counselling to the underprivileged patients.

In the Hospitals

Child Help Foundation coordinates with the patients for good care and counselling throughout their hospital journey. We work alongside the medical partners in the Paediatric oncology wards.

In the Community

Our support extends in the post treatment phase of the cancer surviving patients to enable their overall development. Cancer treatment also has long term side effects. We help the children by fulfilling nursing services beyond hospice care and also by supporting their education enabling them to adapt to the new normal phase of schooling.

Follow up

After the Hospital Care, the children are given Home-Based Care. Our medical coordinators' team keeps in touch with the patient's family to monitor the child's overall progress.

Networking with Best Hospitals or Medical Professionals

Child Help Foundation has a network of 51 hospitals across India. We connect the patients with the best doctors, nurses, and medical professionals for the most advanced technology for treatment. In addition, we are partners with the leading oncology departments.

MEDICAL SUCCESS STORIES

1. ALKESH, 10 years Heart Disease

Alkesh's heart was throbbing with fear. The ten-year-old boy had the unenviable fate of battling a deadly heart disease. However, his treatment cost around Rs. 2,50,000/- (Rupees Two Lakhs fifty Thousand only), which was impossible for his father, who worked as a farm labourer. In his moment of distress, he contacted Child Help Foundation. The donors of Child Help Foundation made it possible for this boy to see the light of day.

2. JHALLI MANVITHA, 5 years Severe Burns

Jhalli's playtime turned into a horrific nightmare when she suffered from severe burns. Her right leg and belly got severely affected by the accident. Doctors said her dressing would require at least Rs. 4,00,000/- (Rupees Four Lakhs only). The parents were not in a position to pay such a huge sum of money. So, they contacted Child Help Foundation for assistance. After verification, we opened a crowdfunding page, where the donors supported Jhalli by providing donations. Thanks to the donors, Jhalli got successfully treated.

MEDICAL SUCCESS STORIES

3. Shrutika, 6 Years Leukaemia

At the tender age of six, Shrutika was tasked with battling deadly leukaemia. Doctors told her parents that she needs treatment as soon as possible, which will cost Rs 8,00,000/- (Rupees Eight Lakhs Only). Shrutika's father was a mere farmer, who didn't have the resources to amass such a huge sum of money. He reached out to Child Help Foundation in the last hour. After which, the donors poured their hearts out to save this little angel.

4. Aarohi, 3 Years Heart Disease

Aarohi's parents were concerned when they saw her deteriorating every single day. She was diagnosed with a severe heart condition. The treatment of her condition was worth Rs. 3,75,000/- (Rupees Three Lakhs Seventy-Five Thousand only). Being an electrician, Aarohi's father couldn't even imagine such a huge sum of money in his wildest dreams. When all hope seemed lost, the donors became a beacon of light. They poured love and affection for Aarohi, which helped her to recover from her deadly disease.

MEDICAL SUCCESS STORIES

5. Purvi Pardeshi, 9 Years Bilateral C.S.O.M

The 9-year-old daughter of Mr and Mrs Pardeshi had been suffering from high fever, extreme cold, and cough since she was two years old. When local medicines proved unable to help, it was discovered that she was suffering was Bilateral C.S.O.M. The surgery was put on hold because the 2-year-old girl was too young for a major surgery. Later, as the situation remained the same and the daughter got older, the surgery became more necessary. But the fees amounted to around Rs. 2,40,000/- (Rupees Two Lakhs Forty Thousand Only), which the family couldn't afford. They turned to Child Help Foundation to help their little daughter's lifelong problem. The surgery was performed, and the little girl was discharged on 17th June. The family lives happily together in their home.

6. Maryam, 6 Years Heart Disease

Maryam is a 6-year-old girl of Mr Salim Pirjade and Mrs Tabasum Pirjade from Pune, Maharashtra. Upon noticing Maryam's fast heartbeats and discolouration of the skin, her parents took her to a doctor. It was found out that she has a hole in her heart and only surgery can cure it. At the AIMS Hospital in Pune, the doctors suggested Urgent Aggressive Medical Management, following PDA Closure Device Heart Procedure. The cost of which was Rs. 2,55,000/- (Rupees Two Lakhs and Fifty-Five Thousand Only.) Child Help Foundation supported the family in arranging the funds for the treatment. Further, aid was also provided to the family after Maryam was discharged from the hospital.

MEDICAL SUCCESS STORIES

7. Aadi Pakole, 14 Months Heart Disease

14 months old Aadi is the son of Mr Nilesh and Mrs Shridevi Pakole from Pune, Maharashtra. He was born with a complex heart defect called Pulmonary Valve Stenosis. At the Aims Hospital, Pune, the doctors advised urgent medical management following the Balloon Pulmonary Valvuloplasty heart procedure. The estimated cost of the treatment is Rs. 2,55,000/- (Rupees Two Lakhs Fifty-Five Thousand Only). Aadi's parents had spent all their savings on his medical procedures and tests. His parents then reached out to Child Help Foundation for support. We helped the family in arranging the funds and the treatment was successfully undertaken.

8. Abhishek Khate, 2 Years Hypospadias

Abhishek Khate is a 2-year-old boy from Parbhani, Maharashtra. He had a lot of pain and suffered from frequent and painful urination. Abhishek suffered from Hypospadias, a congenital disease in males in which the opening of the urethra is on the underside of the penis. The doctors had proposed an urgent Re-do of single-stage Hypospadias. The estimated cost of the treatment was Rs. 2,60,000/- (Rupees Two Lakh Sixty Thousand Only). After one unsuccessful surgery, his parents had no money left for further treatment. Child Help Foundation extended its support to Abhishek's family so that he can be treated. Abhishek is now doing well.

MEDICAL SUCCESS STORIES

9. Abel Arun, 11 Months Cerebral Artery

Eleven-month-old Abel is the only son of Mr Arun and Mrs Blessy Mol Joseph who hails from Idukki, Kerala. One fine day, Abel had a seizure and he was taken to the hospital and he was diagnosed with Cerebral Artery Territory Infarct Status post Decompressive Craniectomy. It is a condition which causes brain haemorrhage. The doctors suggested treatment for Abel was a Cranioplasty, the repair of a skull vault defect costing Rs. 1,35,000/- (Rupees One Lakh and Thirty-Five Thousand only.) When the parents were actively seeking help, they came across a volunteer from our organization. Child Help Foundation came forward to help Abel. He is now successfully treated.

10. B/o of Maheshwari, Infant Premature Birth Complications

In the fifth month of her pregnancy, Mrs Maheshwari underwent an ultrasound scan, which revealed that her baby had a heart defect. She did not want to give up and went ahead bravely. But in the 7th month, her water broke, and she gave birth to a preterm baby. But immediately after the birth, the baby was shifted to the NICU because of prematurity and heart defect. The doctors at Amrita Institute of Medical Sciences and research centre, Kochi, had suggested a Nasal SIMV and continued NICU support for the treatment. The treatment fee was estimated to be Rs. 5,44,000/- (Rupees Five Lakhs Forty-Four Thousand Only), which the family couldn't afford. The family requested Child Help Foundation to save their newborn. The treatment went successfully, and the baby was discharged from the hospital in September 2022 and now lives a healthy life.

MEDICAL SUCCESS STORIES

11. Andriya Sanil, 1 Year Multi Sutural Craniosynostosis

Andriya Sanil is a 1-year-old baby girl from Ernakulam, Kerala. Her father, Mr Sanil Varghese, works as a daily wage labourer to support his family of seven. At 3 months of age, the baby was diagnosed with Multi Sutural Craniosynostosis. After a successful surgical intervention at the Amrita Institute of Medical Sciences and Research Centre, Kochi, the doctors advised that a Craniofacial Major Procedure (2nd stage surgery) only would complete her treatment. The estimated cost of this surgery is Rs. 3,98,500/- (Rupees Three Lakhs Ninety-Eight Thousand And Five Hundred Only). Child Help Foundation was successful in helping Andriya with her complete treatment.

12. Aravindh, Four Years Guillain-Barre Syndrome

Aravindh Reddy is a four-year-old boy, who lives along with his parents, Mr Mahipal Reddy and Mrs Krishnaveri. One morning Aravindh started complaining about a severe stomach ache and later he fainted while walking. Mr and Mrs Reddy were advised to take Aravindh to Ankura Hospital, Hyderabad. The doctors there recommended an MRI Scan, and Aravindh was diagnosed with Guillain-Barre Syndrome. Doctors had suggested continued ventilator support as a part of the treatment. The estimated cost of which was Rs. 6,00,000/- (Rupees Six Lakhs Only). But the family could not afford the surgery and sought the help of Child Help Foundation. Aravindh's surgery was successful and he was discharged on 19th July 2022.

MEDICAL SUCCESS STORIES

13. Chetan, 6 Months Heart Disease

At an age when he should be playing with toys, Chetan was confined to the hospital. He was diagnosed with a serious heart defect that was threatening to take his life. The cost of his treatment was Rs 5,00,000/- (Rupees Five Lakhs Only). Chetan's father made barely enough to pay the monthly expenses for his family, five lakh rupees was unimaginable for him. On being aided by the donors of Child Help Foundation, Chetan received his much-needed treatment.

14. Harshita, Five Months Heart Disease

Harshita is a five-month-old baby girl from Gurugram, Haryana. Her father, Mr Mahesh Kumar works as an autorickshaw driver. The family of five lives in Gurugram, Haryana. When Harshita was some weeks old, she caught a cold and suffered from a high fever. Whenever she cried, her face developed a bluish discolouration. The local doctor advised the family to get her heart checked. The medical tests left her parents shocked. It was discovered that there is a hole in her heart. The baby's parents took her to Paras Hospital, Gurugram for further treatment. The doctors suggested that Harshita needs Open Heart Surgery for VSD Patch Closure. The estimated cost of this was Rs. 5,00,000/-. So he approached Child Help Foundation for assistance. Her surgery went successfully and she got discharged from the hospital on 30th April 2022.

MEDICAL SUCCESS STORIES

15. Bhagyashree Kanavte, 11 Months Heart Disease

11-month-old Bhagyashree from Hyderabad is the daughter of Mr Ganesh and Mrs Anitha. Bhagyashree was born with a complex heart defect called Ventral Septal Defect. She needed heart surgery, estimated to be Rs. 5,93,000/- Being daily wage labourers, Bhagyashree's parents were falling short to arrange the amount of treatment that would save their daughter's life. But due to generous donations, Bhagyashree was able to undergo the treatment she needed and is on her way to a healthy childhood.

24. Rushikesh, 9 Years Heart Disease

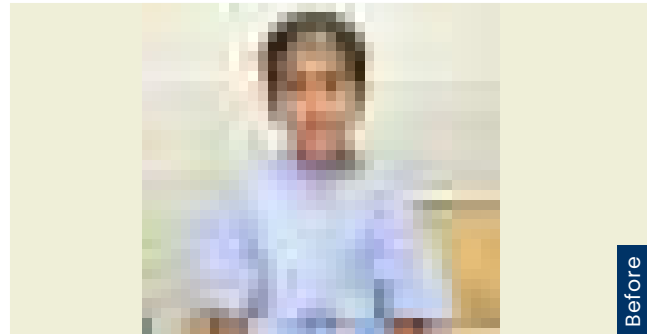

No child should have to worry about their life at the age of nine. But such was the sad fate of Rushikesh, who had been forced to battle a deadly heart condition. The only way to save Rushikesh was through Multiple Mid Muscular VSD, which was worth Rs 3,30,000/- (Rupees Three Lakh Thirty Thousand Only). The mere mention of the amount sent a chill down Ravi's spine. Ravi works as a welder, while his wife works as a farm labourer. They had no way of paying for the medical treatment. But when all hope was lost, kind souls like you poured in love and support, which helped in the successful treatment of Rushikesh.

MEDICAL SUCCESS STORIES

25. Bhargavi, 11 Years Heart Disease

Eleven-year-old Bhargavi became a shell of her former self when she found out that she was diagnosed with Large OS ASD, which meant that she had a hole in her heart. She experienced symptoms like irregular heartbeats (arrhythmias), fatigue and the sensation of rapid palpitations or skipped beats. Happiness withered from the academically brilliant child, her fate now rested on heart surgery. Doctors at Balaji Heart and Diagnostic Center, Mumbai said that the treatment would cost Rs.2,50,000/- (Rupees Two Lakhs Fifty Thousand Only). Bhargavi's father, Amritav worked as a farmer and made a minimum wage. It was next to impossible for him to raise this much money. The parents needed help to be able to pay for their daughter's treatment. Child Help Foundation was successful in helping Bhargavi with her complete treatment.

26. Krishna Mudnar, 11 Years Heart Disease

Krishna Gajanan Mudnar is an 11-year-old son of Mr Gajanan Mudnar and Mrs Archana Mudnar. They are both daily wage labourers belonging to Hingoli, Maharashtra. They work on farms to run their family and look after their three children. Krishna was diagnosed with a heart defect at the time of birth and used to undergo yearly health checkups. After a recommendation from doctors at a health camp, he was taken to the Balaji Heart and Diagnostic Centre in Mumbai where the doctors recommended a heart surgery worth Rs. 3,30,000/- (Rupees Three Lakhs and Thirty Thousand only.) Being aided by Child Help Foundation, the surgery was successfully undertaken.

MEDICAL SUCCESS STORIES

27. Shivaraj Karhale, 9 Years Heart Disease

Shivaraj Karhale is the 9-year-old son of Mr Gangadhar Karhale and Mrs Parvati Karhale. The parents are farm labourers. They struggle to find work and manage to collectively earn only around Rs 4000/- per month. During a school camp, the visiting doctors identified significant issues in his breathing. They suggested an immediate intervention and the parents were informed. At the Balaji Heart and Diagnostic Centre, Shivaraj was diagnosed with Large Perimembranous VSD Anterior Extension and DCRV. The cost of his surgery was Rs. 3,30,000/- (Rupees Three Lakhs and Thirty Thousand only.) After receiving support from Child Help Foundation, the parents could manage the surgery of their son Shivaraj. He is now discharged from the hospital and is recovering.

28. Soham, 11 Years Heart Disease

Soham started suffering from frequent high fever and chest pains. His worried parents took him to a local hospital and after a scan, it was discovered that little Soham had a hole in his heart. The doctors realized that further surgery at that moment was not possible considering Soham's age. Soham continued living with the problems till he reached 11 years of age, but the situation remained the same. Mr and Mrs Dhage took him to Balaji Heart and Diagnostic Centre in Mumbai, and upon diagnosis, they found out that he has a Large Perimembranous LCR with severe PAH and needed immediate treatment. But arranging the money for the surgery was difficult for the parents and they reached out to Child Help Foundation for help. Soham's surgery was successful.

MEDICAL SUCCESS STORIES

29. Yash Langade, 14 Years Heart Disease

Yash Langade, a 14-year-old boy from Solapur, Maharashtra suffered from Ventricular Septal Defect (VSD) with severe Right Ventricular Outflow Tract (RVOT) Obstruction (a complex heart defect). Doctors advised that he undergoes heart surgery after a few years because he was very young. As his condition worsened, doctors told him that, he needs to undergo an urgent Intracardiac Repair of VSD with RVOT obstruction surgery. The estimated cost of the surgery was Rs.3,30,000/- (Rupees Three Lakhs Thirty Thousand Only). Because his family could not afford to pay for the treatment they were provided financial support from Child Help Foundation. Yash's surgery was successful and he was discharged on 7th July 2022.

30. Shristi Kondhare, Nine Months Heart Disease

Shristi Kondhare, a nine-month-old baby girl, was suffering from a critical heart condition. Her father, Mr Haridas Kondhare, owns a small piece of land for farming. After a few months from her birth, they noticed that Shristi was not gaining weight as a healthy child would and she even appeared to be very weak. Tensed, the parents took their baby to a local hospital in Osmanabad, where medical tests revealed that Shristi is suffering from a congenital heart defect. All of their savings had exhausted and they were heartbroken that they couldn't help their little girl. Child Help Foundation financially supported the family and Shristi's surgery was successful and she was discharged on the 9th of May, 2022.

MEDICAL SUCCESS STORIES

31. Burhanuddin Y. Vhore, 3 Years and 9 Months, Cancer

Today, Burhanuddin lives a fulfilling life. However, that was not the case long ago, as cancer gripped him by the throat. He needed to undergo surgery, which was beyond the reach of his parents. However, Burhanuddin's parents approached Child Help Foundation, and the donors saved the day for Burhanuddin.

32. Sinchana, 8 Years Kyphoscoliosis

Sinchana's body was taking an abnormal shape due to her spinal defect. Doctors diagnosed her with Congenital Kyphoscoliosis and said that she would require Bilateral posterior instrumentation, deformity correction, vertebral column resection and fusion. The total cost of the treatment was Rs. 4,00,000/- (Rupees Four Lakh Only), which was a cruel blow to her parents. But when all hope was lost, kind souls like you poured in love and support, which helped in the successful treatment of Sinchana.

MEDICAL SUCCESS STORIES

33. Devika, 6 Years

Dorsolumbar Kyphotic Deformity

It seemed as if Devika's childhood would be spent in misery, as she was diagnosed with Dorsolumbar Kyphotic Deformity. Devika couldn't run or play around like normal children because of her spinal deformity. The only way to restore the robbed independence in her life was through surgery which came with a price tag of Rs 3,50,000/-. Devika's father was an auto rickshaw driver, while her mother earned her living as a daily wage worker. They were losing hope for their daughter, as they had no way to amass the massive amount. But thanks to the generous donations of our donors, Devika looks forward to living a healthy life.

34. Kavya Kumar, 10 Years

Scoliosis

The child of Mr and Mrs Kumar was diagnosed with Adolescent Idiopathic Scoliosis (Spinal Deformity) and needed urgent Deformity Correction surgery. The family couldn't afford the surgery as it cost Rs. 4,50,000/- (Four Lakhs Fifty Thousand Only). They turned to Child Help Foundation to help their daughter's lifelong problem. The surgery was performed, and the little girl was discharged on the 16th of August. The family lives happily together in their home.

MEDICAL SUCCESS STORIES

35. Shubham Solnkar, 9 Years Heart Disease

Shubham Solnkar hails from Solapur, Maharashtra. He had a complex heart defect. He could not even live his daily life without pain as he was growing weaker every day. The doctors at the Balaji Heart and Diagnostic Centre, Mumbai advised Intracardiac repair of VSD Closure as a part of his treatment. The estimated cost of the surgery was Rs. 2,50,000/- (Rupees Two Lakhs Fifty Thousand Only). Shubham's father works on a farm and he couldn't source money for his son. He turned to Child Help Foundation for help and the required amount was raised for Shubham. He is now recovering from his sickness.

36. Bo Mounika, 9 Months Meningitis

Nine-month-old b/o Mounika had been suffering from Meningitis, with Spinal Micro Abscess, a rare spinal infection where infected material (pus) and germs get collected around the spinal cord. The family took their daughter to Sowmya Children's Hospital, Hyderabad, where the doctors suggested a PICU Stay as part of the treatment. The estimated cost of the treatment was Rs. 2,00,000/- (Rupees Two Lakhs Only). The mother who took care of her baby alone approached Child Help Foundation for help. The surgery went successful, and the baby was discharged on 20th September 2022, and the mother and daughter live happily now.

MEDICAL SUCCESS STORIES

37. Barnali, 12 Years Kyphoscoliosis

A gifted student, the future was looking bright for twelve-year-old Barnali. However, fate decided to play a cruel joke on her, and she was taken down by Left Dorsolumbar Kyphoscoliosis. Her spinal cord took a grotesque structure, and the disease even stopped her growth. Doctors said that Barnali needs to undergo bilateral posterior deformity correction vertebral column resection and fusion. The problem was that the treatment cost around Rs 6,00,000/- (Rupees Six Lakhs Only). Barnali's father, Nayan Mahanta worked as a labourer in a fish market and only earned Rs 10,000. He couldn't even imagine such a huge sum of money. In such a crucial time, Child Help Foundation stepped in and helped in Barnali's treatment.

38. Avanthika, 5 Years Scoliosis

Avanthika was diagnosed with Congenital Scoliosis (a rare spinal deformity) at birth. The doctors had informed the parents that she will need a deformity correction procedure when she grows up. But her condition worsened by the time she turned five. The doctors at Bhagwan Mahaveer Jain Hospital, Bengaluru suggested urgent treatment (Deformity Correction and Vertebral Column Resection and Fusion) for Avanthika. The estimated cost was Rs. 5,00,000/- (Rupees Five Lakhs Only). Her parents work on a farm to manage the family. However, the medical costs were too expensive for them. They asked Child Help Foundation for help. After successfully raising funds, the treatment took place and Avanthika is now doing well.

MEDICAL SUCCESS STORIES

39. Akshaya, 13 Years Kyphoscoliosis

13-year-old Akshaya was admitted to Bhagwan Mahaveer Jain Hospital, Bengaluru, as she was diagnosed with Congenital Kyphoscoliosis. The treatment consisted of two surgeries which the mother couldn't afford. The first surgery was successful due to the kindness of the neighbours, but the second surgery, which amounted to Rs.2,60,000/- (Rupees Two Lakhs and Sixty Thousand Only), was too much. The mother, having no option left, turned to Child Help Foundation for the safety of her daughter's life. The surgery was performed, and the little girl was discharged on 10th September 2022. The family lives happily together in their home.

40. Shivadarshini, 6 Years Spinal Defect

Shivadarshini, a six-year-old girl from Chamrajnagar, Karnataka suffered from a spinal deformity. But her parents became worried when after 1.5 years of her birth, Shivadarshini couldn't sit or walk properly. Her body seemed to be shifted on one side. After a few check-ups, it was found that she is diagnosed with Congenital Thoracolumbar Scoliosis (a sideways curvature of the spine that is caused by a defect that was present at birth). The doctors suggested vertebral column resection, deformity correction, and fusion as a part of her treatment. The estimated cost of Shivadarshini's treatment was ₹5,00,000/- (Rupees Five Lakhs Only). This was beyond the family's financial capabilities and they reached out to Child Help Foundation for support and Shivadarshini's surgery was successful. Little Shivadarshini was discharged on 2nd July 2022.

MEDICAL SUCCESS STORIES

41. Leela Gowda, 11 Years Kyphoscoliosis

The baby of Mr and Mrs Gowda was suffering from a rare spinal condition. From the age of 8, the baby was unable to sit and stand straight. Taking it as a back injury, the parents took her to a hospital, but it was discovered she suffered from Congenital Thoracolumbar Kyphoscoliosis. For the surgery, a sum of Rs. 5,00,000/- (Rs. Five Lakhs Only) was needed, which the family couldn't afford. They turned to Child Help Foundation to help their little daughter. The surgery began, and their daughter was discharged on 11th June, after which she was able to sit and stand properly. The family now lives happily with their playful little daughter.

The twins of Mr and Mrs Vidhate were born prematurely and were taken to NICU. Their health kept deteriorating day by day and they needed external oxygen support to live. The idea of ongoing treatment distressed the parents because of the lack of funds to pay the hospital, which demanded a fee of Rs. 10,00,000/- (Rupees Ten Lakhs Only). The family requested Child Help Foundation to save their little children. The treatment went successfully and the twins were discharged from the hospital on 4th June and now live a healthy life.

MEDICAL SUCCESS STORIES

63. Bo Saista, 18 Days Premature Birth Complications

Saista was born prematurely. The baby boy was extremely weak and could only be saved by a prolonged stay in the NICU. However, upon finding out that the treatment would cost Rs 2,00,000/- (Rupees two lakhs only), the parents were distraught. The family barely managed to pay for their monthly expenses, and they had no way of paying for their son's treatment. Child Help Foundation thus completed the necessary verification and the donors helped the family in arranging funds for the baby's treatment.

64. Bo Rubina, 5 Days Premature Birth Complications

A catastrophe struck the family of Rubina and Kazi when their baby was born prematurely. Doctors at Silver Crest Hospital, Haryana said that the baby girl needed a NICU stay which would cost around Rs 1,50,000 (Rupees One Lakh Fifty Thousand Only). Kazi, who works as a housekeeper, only earned Rs 12,000, which was barely enough to support his family of four. He had no way of paying for the treatment. But when all hope was lost, kind souls like you poured in love and support, which helped in the successful treatment of Rubina's daughter.

MEDICAL SUCCESS STORIES

65. Baby of Mahfuza, 25 Days Premature Birth Complications

The baby of Mahfuza was born in severe pain and distress. Mahfuza gave birth to the baby while she was only seven months pregnant. Naturally, the baby was born extremely weak and had severe respiratory issues. Doctors at Silver Crest Hospital said that he needed Post Surfactant and Post Mechanical Ventilation PPHN/ PDA shock, which came with the cost of Rs. 5,00,000 (Rupees Five lakhs only). Mahfuza's husband, Abubakkar Siddik worked in a hotel and earned minimum wage, which was barely enough to put food on the table. However, with the help of Child Help Foundation, he was able to treat his baby boy successfully.

73. Baby of Shirisha, 17 Days Premature Birth Complications

Mrs Shirisha gave birth to a small girl through a C-section delivery since she was suffering from PIH (Pregnancy Induced Hypertension), which caused the baby to suffer from respiratory problems. Mrs Shirisha was discharged from the hospital, but the baby had to undergo another mechanical ventilator treatment. The hospital fee was estimated to be Rs. 12,00,000/- (Rupees Twelve Lakhs Only). The family turned to Child Help Foundation as their last hope. The surgery was successfully performed, and the little girl was discharged on 30th August. The family leads a content life now, along with their healthy daughter.

74. Twin Girls of Drisya, 10 Days Premature Birth Complications

The twin baby girls of Mrs Drisya and Mr Abhilash were born in the 32nd week of pregnancy (7.5 months). They suffered from extreme prematurity, low birth weight and respiratory distress syndrome. Both the babies weighed 1,270 grams and required NICU stay to develop healthily. The estimated cost of their treatment was Rs. 5,00,000/- for each baby, meaning Rs. 10,00,000/- for them both. But since Mr Abhilash is the sole breadwinner and earns only Rs. 4,000/- per month by working as an autorickshaw driver. They reached out to Child Help Foundation for financial support and the baby girls were discharged on 2nd July 2022.

MEDICAL SUCCESS STORIES

75. Moni Kumari, 12 Years Cleft Lip

Moni Kumari is a 12-year-old girl from Haryana. Her father, Mr Dawlu Mandal, and mother, Mrs Archana Devi, are factory workers. Moni had a cleft lip, which is a split in the upper lip. The doctors, after Moni's birth, suggested surgery for her condition. But because of their poor financial condition, her parents could not manage to afford the cost of treatment. As she grew up, Moni started to face difficulty in breathing and had frequent colds. When checked with the doctors, it was discovered that Moni was suffering from Aspiration Pneumonitis. The doctors suggested treatment for Moni's condition. The estimated cost of which was Rs. 2,00,000/-. They had reached out to Child Help Foundation for help and Moni's treatment was successful.

76. Twins of Jisha, 6 Days Premature Birth Complications

The twins of Mrs Jisha were put in NICU due to immediate delivery. Since they were suffering from extreme premature symptoms, the doctors advised an extended stay at the hospital, estimated to be Rs. 1,30,000/- (Rupees One Lakh Thirty Thousand Only). The family requested Child Help Foundation to save their little children. The treatment was successful, and the twins were discharged from the hospital on the 16th of August and now live happily.

MEDICAL SUCCESS STORIES

77. Triplets of Lijy, 12 Days Premature Birth Complications

Mr Chacko Mathew and Mrs Lijy Raju who hail from Thiruvalla, Kerala were excited to become new parents and were living in a very blissful state. However, the doctor told them that they needed to urgently deliver the babies and that they would be premature. The couple became parents to triplets, 2 baby boys and 1 little girl, who at 12 days old were kept in NICU. The estimated cost of their treatment was Rs. 4,00,000/- (Rupees Four Lakhs Only). The family was in distress because they couldn't afford the treatment and they reached out to Child Help Foundation. The triplets were kept in NICU and their treatment was successful, they were discharged on 4th July 2022.

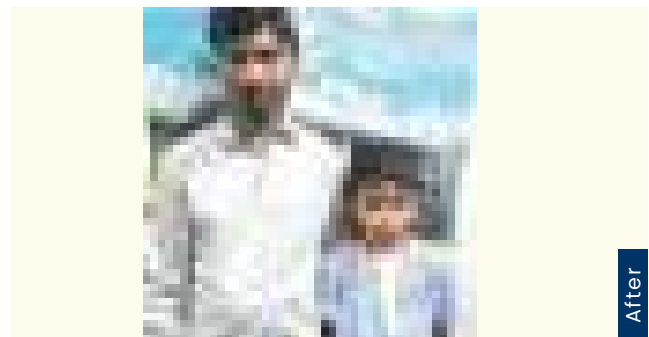

78. Baby of Pooja, 10 Days Premature Birth Complications

The baby of Mrs Pooja was born prematurely because of blood pressure fluctuations, and Mrs Pooja suffered. Because of the sudden premature C-Section delivery, the baby weighed around just 880 grams. The baby boy was suffering from extreme prematurity along with sepsis (a condition that occurs when the body's response to an infection damages its tissues), and jaundice. Continuing NICU treatment was advised for the baby to survive and the cost amounted to Rs.2,00,000/- (Rupees Two Lakhs Only). The family approached Child Help Foundation to save their little boy's life. The treatment was successful and the family lives happily with their healthy boy.

MEDICAL SUCCESS STORIES

79. Kartik Naik, 11 Years Heart Disease

Eleven-Year-Old and already in a heap of pain, Kartik Naik had the misfortune of being diagnosed with a severe heart condition. Doctors said that he would have to undergo a procedure called ICR of subaortic membrane resection, which came with the cost of Rs 2,50,000/- (Rupees Two Lakhs Fifty Thousand Only). The mere mention of the amount sent a chill down the spines of his parents, who had no way of arranging the money. In such a dire situation, the donors stepped in and save the day for Kartik Naik. Today, the child looks forward to leading a normal life.

80. Bo Laya, 3 Days Respiratory Disease

Kattekola had already been financially ruined by the treatment of his neurological disorder in 2017. The already faint glimmer of happiness in the family's life was the expected baby. However, the baby was born extremely weak. The baby needed a treatment consisting of a prolonged mechanical ventilator inotropic support, IV fluids, IV antibiotics, and ICD and warmer care. However, the treatment came with a cost of Rs.5,00,000 (Rupees Five Lakhs Only). Kattekola works at a garment shop and earns a minimum wage. However, after taking the help of Child Help Foundation, he was able to treat his baby boy.

MEDICAL SUCCESS STORIES

81. Aliya Fatima, 15 Years Kidney Disease

Aliya Fatima is a 15-year-old girl from West Bengal. When she was 14, Aliya developed a severe fever. The girl was diagnosed with End-Stage Renal Disease. It became a challenge for her family to continue her treatment, as her father is a driver. Doctors advised that a Kidney Transplant was her last hope of survival. After a lot of challenges, the family was striving to face this difficult phase of their life. The estimated cost of the surgery was Rs. 10,30,000/-. The expense was too huge for the family to bear. They had already put everything they own at risk to save Aliya. However, with the help of generous donors and the support provided by Child Help Foundation, Aliya's surgery was successful.

82. Baby of Jahana, 14 Days Premature Birth Complications

Mrs. Jahana faced some complications in her uterus during pregnancy and their baby was born prematurely in just 7 months. They had already lost their first child, who was also preterm. The second baby was in NICU stay and a fee of Rs. 3,00,000/- (Rupees Three Lakhs Only), was needed. The parents contacted Child Help Foundation for help to save their last hope. The treatment was successful and they were discharged on 18th June. The family happily lives with their daughter who is healthy now.

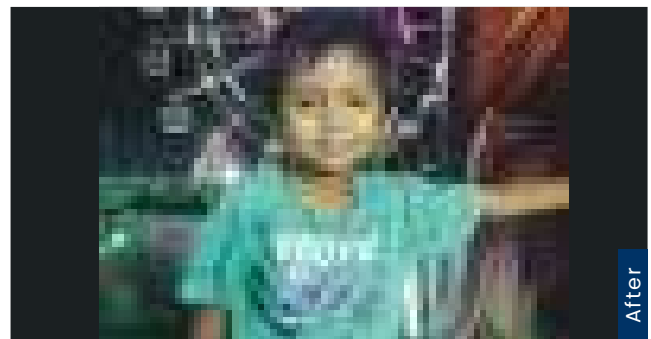

MEDICAL SUCCESS STORIES

83. Krithik, 4 Years Pneumonia

Krithik was diagnosed with pneumonia and needed urgent HHHFNC support to cure his disease. The family did everything to get their son cured but to no avail. After a few days, as his situation got worse and worse, the doctors advised them to go to Lotus Hospital, Hyderabad. The family thought their son would get treated successfully this time, but their world was shattered when they learned that the treatment fee was Rs. 7,00,000/- (Rupees Seven Lakhs Only). With no help from anywhere, the family reached out to Child Help Foundation to save their little boy. The surgery succeeded, and Krithik was discharged from the hospital on 26th September 2022.

Radha was diagnosed with Tricuspid Atresia, an inherited heart defect. The specialists suggested that Radha would have to undergo heart surgery. The estimated cost of the surgery was Rs 4,50,000/- (Rupees Four Lakhs and Fifty Thousand Only). Since the parents could not afford to pay a large sum of money for an operation, she was given temporary medical care every time Radha fell ill and would return home. Radha's illness continued through all of this and her condition only worsened with time. She was admitted to Fabiani and Budhrani Heart Institute in Pune, Maharashtra. After a few days, surgery was successfully done.

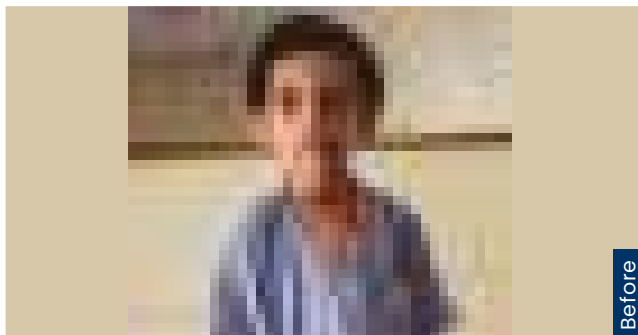

110. Shiv Dev, 4 Years Cleft Lip

Four-year-old Shiv Dev was suffering from cleft lip and the only hope lay in urgent treatment, which came with a hefty price tag. This treatment was impossible, as the entire family lived on meagre incomes. However, when the situation seemed bleak, the donors became a superhero for the little one and helped him get out of his predicament. Today, Shiv Dev's complications have become a mere footnote in his life, as he continues to thrive and grow just like all his peers.

MEDICAL SUCCESS STORIES

111. Shifa Tahimin, 11 Years Heart Disease

Shifa was suffering from congenital heart disease. Somedays, she even had to skip school because of her unrelenting weakness. Doctors at Kamneni Hospital, Hyderabad said that Shifa needed to undergo VSD Surgical closure, and this procedure would cost Rs 4,75,000/- (Rupees Four Lakhs Seventy-Five Thousand Only). Mohmad Khaleel works as a contracted labourer and is the sole breadwinner of the family. His meagre income is barely enough to feed his family of six. However, after taking the help of Child Help Foundation, he was able to treat his little daughter. She was happily discharged on 10th April 2023.

112. Smarnika, 5 Years Heart Disease

Five years of Smarnika's life were spent in dread, as she battled a deadly heart condition since she was born. Her treatment came with an enormous price tag. For her parents this was an enormous blow, as they survived on the income of a sole breadwinner, who was a farmer. However, now she lives a comfortable life, which was only made possible, with the help of kind donors, who poured their hearts out in support.

MEDICAL SUCCESS STORIES

113. Twins of Pavithra, 1 Month Premature Birth Complications

Pavithra's twins, a boy and a girl weighed only around 750 grams and 820 grams when they were born. They were admitted to the NICU (Neonatal Intensive Care Unit) of the Kovai Medical Center and Hospital Private Limited, Tamil Nadu. The twins were suffering from extreme preterm symptoms and respiratory distress syndrome. The doctors proposed Surfactant Therapy Parenteral Nutrition (CPAP) as a part of the baby's treatment. The estimated cost of the treatment was 12,00,000 /- (Rupees Twelve Lakhs Only). They had already mortgaged their small property to fund the treatment. The family reached out to Child Help Foundation to save their little twins.

114. B/O Sivgami, 20 Days Premature Birth Complications

Sivagami Rangappanaikar was in severe pain on the night of 24th November 2022 when she delivered a premature baby boy in her 7th month of pregnancy. The complication was caused due to less blood circulation in her body. Baby of Sivagami was admitted to the Neonatal Intensive Care Unit (NICU) of the Kovai Medical Center and Hospital Limited, Namakkal, Tamil Nadu. The doctors proposed a Parental Nutrition CPAP NICU Stay for the Extreme Preterm, Low Birth Weight Distress Syndrome of the patient. The estimated cost for the treatment was Rs 7,00,000/- (Rupees Seven Lakhs Only). Child Help Foundation came forward for help and treatment was successfully done and discharged on 14th February 2023.

MEDICAL SUCCESS STORIES

115. Divyanshu Kumar, 1 Year Heart Disease

Divyanshu was born with a heart defect at a small community hospital where treatment was unavailable. After switching various hospitals at last, the parents admitted Divyanshu to Mahavir Heart Hospital in Bihar where the doctors informed them that Divyanshu was supposed to undergo Intra Cardiac Repair for VSD Closure Surgery a year ago and that the family had wasted a lot of time. His heart defect had worsened and he needed urgent surgery to survive. The Father, having no option left, turned to Child Help Foundation for the safety of his son's life. The treatment was done, and the little boy was discharged on 20th August 2022. The family lives happily together in their home.

116. Ruthra Sree, 3 Years 8 Months Heart Disease

Ruthra Sree was detected with heart problems but the parents wanted to wait to undertake the treatment because of her tender age and lack of finances. However, when she started facing issues with breathing and discolouration in her skin due to prolonged sickness, she had to be hurried to the hospital. The doctors at MIOT International Hospital in Chennai, Tamil Nadu suggested an urgent operation (Elective ASD device closure) of the heart for correction. The estimated cost of the treatment was Rs.1,90,000 (Rupees One Lakh and Ninety Thousand Rupees Only). The family could not find the means to pay for their child's treatment. Child Help Foundation came forward to help and operation was successfully done

MEDICAL SUCCESS STORIES

117. Karan Zalke, 9 Years Heart Disease

What started as mere fatigue and weakness, turned out to be a severe heart defect called Large Os ASD. Doctors suggested that Karan needed to undergo ICR of ASD Closure, but the cost of this treatment was Rs 2,50,000/- (Rupees Two Lakh Fifty Thousand Only). Karan's Father, Ukande earned a meagre income which was barely enough to cover the daily expenses of his family. He had no way of amassing such a huge sum of money. Child Help Foundation thus completed the necessary verification and helped the family in arranging funds for Karan Zalke.

118. Bo Shakuntala, 21 Days Premature Birth Complications

Mrs Shakuntala Yadav went into labour at 7 months into her pregnancy and successfully gave birth to a baby boy. However, after the delivery, the doctors informed the parents that their newborn was suffering from prematurity and had a significantly low birth weight. Their little boy was put on ventilator support for 5 days. The doctors in Neo Clinic said that the treatment would cost Rs. 8,00,000/-. Therefore they approached Child Help Foundation. After all the necessary verification, the donors of Child Help Foundation helped with the baby's treatment.

MEDICAL SUCCESS STORIES

119. Krishant Chouhan 1 Year 5 Months Sepsis

Kamlesh and Sonu, parents of Krishant thought a liver transplant would give their son a new chance at life. Little did they know that their worst troubles were just starting to form. After the transplant, it resulted in a blood infection and the doctors of Rainbow Children's Hospital, Hyderabad, diagnosed him with sepsis. For further treatments, Krishant required expensive antibiotics antifungals and immunoglobulin and the cost was Rs 15,00,000/- (Rupees Fifteen Lakhs Only). His father had already spent around Rs 21 lakh for his son's treatment but he had no option but to seek help. That's when Child Help Foundation with the help of our donors came to Krishant's aid and helped him in his successful treatment.

Coughing fits, severe back pain, severe weight loss, joint pain, and body weakness became the norm for her. Hope was dying out for Shreya. However, the love of donors and well-wishers proved everyone wrong, who with their donations and shares helped Shreya beat her heart disease.

MEDICAL SUCCESS STORIES

123. Rajeshwari, 9 Years Heart Disease

Rajeshwari Sable is a nine-year-old girl from Telangana. Little Rajeshwari was suffering from a congenital heart defect. It troubled her with weakness, frequent colds and coughs and high fever growing up. She was advised to undergo heart surgery for her condition but financial constraints prevented the surgery. Rajeshwari's father, the sole breadwinner of the family managed to bring just Rs. 300 per day which was not enough for their monthly expenses. Arranging an amount of Rs. 4,75,000 was beyond their capabilities but Rajeshwari's surgery had to happen. During her tough times, your kindness stood with her and only with your support she received the required treatment and lives a healthy life. Thank you, donors!

124. Aditya Binnar, 12 Years Scoliosis

Aditya Binnar was bending due to his scoliosis, which was making daily life difficult for him. His condition could have been solved with Scoliosis Deformity Correction. The only problem was that it was worth Rs 6,50,000/- (Rupees Six lakhs Fifty Thousand). Adding to the parents' misery, The untimely rain washed away all their crops, which severely affected their income. It was at this moment, the donors stepped in and rescued Aditya from his condition. Today, Aditya looks forward to living a disease-free life.

MEDICAL SUCCESS STORIES

125. Kanaiya, 10 Years Heart Disease

Kanaiya's woes started just three weeks after being born. After suffering from a high fever for a prolonged period, Kanaiya was diagnosed with a severe heart condition. For more than nine years, Kanaiya had been suffering from his condition, and the doctors at Fortis Hospital, Mulund said that he needed to undergo treatment which included CT Scan, Cardiac Catheterization, Fontan Procedure and Completion. The cost of the entire treatment was coming around Rs. 3,12,000/-. Kanaiya's father earned a meagre income as a daily wage labourer. Even in his wildest dreams, he couldn't imagine earning such a huge sum of money. When all hope seemed lost, kind and generous donors stepped in to save the day. Today, Kanaiya's health complications have become history.

126. Rishank, 6 Years Epilepsy

Rishank, a six-year-old boy suffering from Drug-Resistant Epilepsy, was able to undergo the necessary Epilepsy Surgery at Fortis Hospital in Mumbai. The estimated cost of the surgery, amounting to Rs. 5,75,000, was covered, alleviating the financial burden on Rishank's family. As the sole breadwinner, Rishank's father had limited income, and the family was struggling to afford the treatment expenses. However, with the help of generous donations, Rishank received the medical intervention he urgently needed. The family is immensely grateful for the support and hopeful for a brighter future for their son.

However, five years later, his condition began to deteriorate. His mother, Shankari had to quit her job to take care of her son. The entire financial burden fell on Dulal Patra who had to arrange 10,00,000/- (Rupees Ten Lakhs Only) for his son's bone marrow transplant at HCG/ MSR Cancer Centre. But his meagre income of 10,000/-, was not nearly enough for his son's treatment. But with the help of Child Help Foundation, Hitesh was able to undergo a much-needed bone marrow transplant.

MEDICAL SUCCESS STORIES

129. Midhun, 2 Years Steroid Resistant Nephrotic Syndrome

Two-year-old Midhun from Kerala was suffering from Steroid Resistant Nephrotic Syndrome, a heterogeneous disease that includes an immune disorder. He was proposed for prolonged ICU and Ventilator support as treatment by the doctors. The estimated cost of the treatment was Rs. 10,00,000/-. Midhun's father, being the sole breadwinner of the family, was feeling hopeless as his minimal income was insufficient to even bear their monthly expenses, let alone the cost of the treatment. But with the help of kind donors like you, Midhun received the treatment right in time and today he is safe at home with his parents. Thank you for supporting Midhun during his miserable times.

130. Gourav Kamble, 10 Years Biliary Atresia

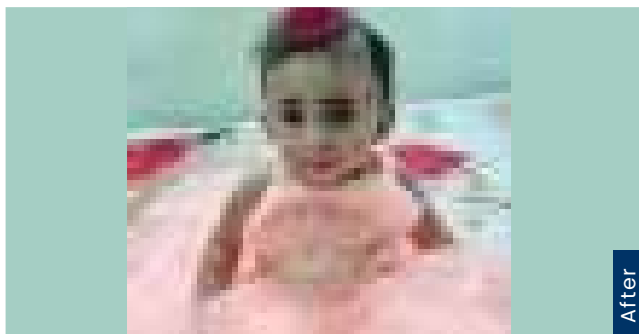

Biliary Atresia forced Gourav Rao to know the bitter taste of medications before baby food. Doctors suggested an urgent liver transplant for Gourav, which was beyond the means of his parents. His parents then approached Child Help Foundation for help, whose donors helped to raise money for Gourav's treatment.

MEDICAL SUCCESS STORIES

131. Baby of Uma, 10 Days Premature Birth Complications

The baby of Uma, a premature infant, faced respiratory distress due to a lack of oxygen during birth. He is currently receiving treatment at Renova Neelima Hospital, Hyderabad. The doctors recommend CPAP and NICU treatment for one month to improve his condition. Mr. Srinivas Reddy, the sole earner of the family, works as a housekeeper. The estimated cost of treatment is Rs. 3,50,000. Child Help Foundation stepped in to support the family, providing the necessary funds for the baby's treatment. With Child Help Foundation's help, the baby received the required medical care, giving hope for his recovery.

132. Baby of Renuka, 1 Day Premature Birth Complications

Renuka gave birth prematurely, and her newborn baby was fighting for her life at Renova Children's Hospital in Telangana. The baby was underweight and suffered from complications, including jaundice and respiratory difficulties. The doctors had recommended CPAP respiratory support and a two-month stay in the NICU. The estimated cost of treatment was Rs. 7,00,000. As a salesman with limited income, Mr. Koramuttla Siva Sankar was unable to afford the daily hospital expenses. Child Help Foundation (CHF) stepped in to assist the family in their time of need. Thanks to the support and generosity of CHF, the necessary funds were raised to cover the baby's treatment costs. The baby received the critical care required, offering hope for her recovery and a brighter future.

MEDICAL SUCCESS STORIES

133. Baby of Sandhya Rani, 12 Days Premature Birth Complications

Sandhya Rani gave birth to a premature baby boy on 28th Sept. 2022. The baby was suffering from severe symptoms of prematurity, his lungs and eyes hadn't developed properly. The doctors at the Renova Neelima Hospital, Hyderabad had suggested a prolonged NICU stay as a part of his treatment. The estimated cost was Rs. 8,00,000/-. The baby's father, who worked as a cab driver, could not afford the prolonged medical care, so he reached out to us. Child Help Foundation extended support for the care of the child, and he received life-saving treatment, which was successful

134. B. O Rajimol, 6 Days Premature Birth Complications

A heartwarming tale of resilience and compassion unfolds as we witness the miraculous journey of a 6-day-old baby boy. Born prematurely to Rajimol Shaji from Alappuzha, Kerala, this brave little fighter overcame the challenges that threatened his life. Thanks to the incredible support of Child Help Foundation (CHF), the baby received timely medical intervention and surgeries to address the lumps at the back of his head. Through the dedicated efforts of the medical team at Tiruvalla Medical Mission, Kerala, and the generous contributions of donors, the baby's health gradually improved. Today, this once fragile infant thrives, surrounded by the love and joy of his grateful family. This inspiring success story is a testament to the power of compassion and collective action in transforming lives.

MEDICAL SUCCESS STORIES

135. Donica Reddy, 3 Years Leukemia

Three-year-old Donica Reddy was diagnosed with Acute Myeloid Leukemia (AML). Her parents, Mr. Sumanth and Mrs. Theja faced the challenge of finding the best treatment for their daughter. They sought medical assistance at Swetha Hospital in Tirupati and Rainbow Hospital in Hyderabad, where Donica underwent chemotherapy. However, the doctors advised a bone marrow transplant as the next step. With limited financial resources, Donica's parents, supported by Child Help Foundation (CHF), raised funds for the costly procedure. Their support saved Donica's life and contributed to her journey toward a healthier future.

However, Safna did not have to wait for long as the donors raised money for her treatment and saved her from depths of despair.

ONGOING MEDICAL CASES

1. Binsha Binu, 14 Years Kidney Disease

Binsha is a 14-year-old boy from Alappuzha, Kerala. He is suffering from chronic kidney disease, stage V. His kidneys are damaged, and he needs a Renal Transplant worth Rs. 10,00,000/- (Rupees Ten Lakhs Only). But he has a long history of the disease, of a few years and hence, his father, who is a daily wage labourer, has spent all his life's savings on Binsha's treatment so far. Binsha is currently taking treatment at Medical Trust Hospital, Kerala and his transplant is due soon but arranging an amount in lakhs is nearly impossible for Binsha's parents.

His father, Mr Binu, earns a meagre income that barely supports his family of six members. Being the sole breadwinner of the family, the burden of responsibilities has overloaded his shoulders, but he wants to fight for his son's life. Binsha needs your help so he can recover and live the healthy life that he deserves. Please help him fight this battle against kidney disease.

2. Ajwal, 3 Years Heart Disease

Ajwal has been diagnosed with 'CTGA Intact Ventricular Septum S/p PA Banding', a severe heart condition. It all started when his parents noticed that he was losing a lot of weight. After rushing him to the doctors, the parents found out that their child was in such a sorry state. Even after undergoing surgery, Ajwal's condition has not improved. Now, the doctors at Amrita Institute of Medical Sciences in Tamil Nadu have said that the child needs to undergo Cardiac CT, Double Switch Operation, and Tricuspid Valve Repair. The estimated cost of the treatment is coming around Rs. 6,00,000/- (Rupees Six Lakhs Only).

Ajwal's father, Ajesh toils day and night as a construction worker and makes scanty income. He is the sole breadwinner in his family of six. He has exhausted all his savings for his son's treatment, but it hasn't been enough.

Please come to the aid of Ajwal during his time of crisis. Donate as much as you can to save this child.

5. Aleena, 3 Years Transfusion Dependent Thalassemia Major

Aleena is the only daughter of Mr Akbar and Mrs Anjum. They belong to Gadag, Karnataka. Mr Akbar (father) works as a labourer and earns about Rs. 8,000/- monthly (Rupees Eight Thousand Only). Mrs Anjum works on a farm. They make very little money only to support their family. Everything was going smoothly until one day when the parents observed their daughter was not feeling well and took her to the closest medical aid. After performing a few tests, the doctors diagnosed Aleena with Transfusion Dependent Thalassemia Major. The experts recommended that Aleena receive blood transfusions every 15 days.

Despite the blood transfusion, Aleena's condition did not heal. The doctors then recommended her to undergo a bone marrow transplant. At the moment, Aleena is admitted to Narayana Hospital, Karnataka. The estimated cost of the treatment is 28,00,000/- (Twenty-Eight Lakhs Only). They need your support.

6. Khadija Gaonkhadkar, 5 Year Urinary Infection

Five-year-old Khadija is the elder daughter of Mr Salam and Mrs Mueena from Maharashtra. Khadija is suffering from Urinary Incontinence. Khadija is currently getting treatment at Surgical Urology and Multispeciality Hospital, Maharashtra. The doctors have advised a treatment called Augmentation Ileocystoplasty and Bladder Neck Reconstruction Mitrofanoff procedure.

The estimated cost of the treatment is Rs. 3,00,000/- (Rupees Three Lakhs Only). Khadija's parents have spent lakhs of rupees on the treatment so far; they had to borrow the money from different places resulting in a massive debt on their shoulders. The family is in dire need of your help; please support.

ONGOING MEDICAL CASES

7. Varshith, 5 Years Aplastic Anemia

After a successful Bone Marrow Transplant, Mr. and Mrs. Reddy felt that their kid's life would return to normal and they would be able to live happily, but their dreams shattered again when little Varshith complained to them of severe fever. Worried, they admitted him to Sri Ramachandra Medical Centre, Chennai, Tamil Nadu where after a few check-ups, he was diagnosed with Aplastic Anemia. The parents were devastated when the doctors informed them about the severity of this disease. For them, their little boy had gone through enough, which made this situation unbearable.

Varshith needs chemotherapy and Hematopoietic Stem Cell Transplantation (HSCT) as a part of his treatment which is estimated up to 30,00,000/- (Rupees Thirty Lakhs Only). The family sold everything they owned to afford Varshith's previous treatment. Now they have left with nothing to arrange for this huge sum of money. The Reddy family is in dire need of your support. Please help them save their loving son.

8. Dheeraj, 4 Year Aplastic Anemia

It was a typical sunny day in Cherai, Kerala when suddenly four-year-old Dheeraj fell ill. Days went by, and Dheeraj got sicker than before. His condition worsened, and his parents had to admit him to the Amrita Institute of Medical Sciences in Kerala. The doctors there diagnosed little Dheeraj with severe Aplastic Anemia. The doctors there proposed an Immuno Suppressive Therapy, that would cost around Rs 8,00,000/- (Rupees Eight Lakh Only).

Dheeraj's father, Vishuraj is a daily wage labourer and earns a meagre daily wage. Greeshma, the mother of Dheeraj, is a daily wage labourer as well but mostly stays at home due to Dheeraj's worsening condition. Dheeraj's parents have already spent a whopping three lakh rupees on his diagnosis. They mortgaged their only house and are now living with their in-laws. They have exhausted all their savings and are struggling to get by each day.

ONGOING MEDICAL CASES

9. Amulya, 9 Years Thalassemia Major

Amulya is the 9-year-old daughter of Mr Ramanjaneya and Mrs E Lalitha Kumari. They hail from Nayakanahatti in Bengaluru, Karnataka. The mother and father both work as labourers to run their family of six members. The father himself is a heart patient and he keeps ill on most days. With great difficulties, they manage to earn around Rs. 5000/- per month.

The youngest child of the family, Amulya has been diagnosed with Thalassemia Major. She is on medication and also undergoes blood transfusion every 15 days. The family has made all efforts in the monthly treatment by selling off the small number of possessions they owned and also by taking loans from acquaintances. They have nothing left for the upcoming treatment of their daughter. Amulya is being treated at the Narayana Hospital in Bengaluru. The doctors have recommended a Bone Marrow Transplant which costs Rs. 21,30,000/- (Rupees Twenty One Lakhs and Thirty Thousand Only). The family is in great distress. They need your support. Help this family save their child.

10. Inayath, 7 Years Thalassemia Major

Gulam Mahmood still remembers the eighteenth day of April 2015, when the eldest son in his family was born. He still fondly remembers little Inayath's first cry. But Gulam Mahmood never thought even in his nightmare that Inayath would suffer from deadly Thalassemia Major. Inayath, who is seven years old now suffers from coughing fits, severe pneumonia, severe weight loss, blood loss, and extreme body weakness. He needs blood transfusions every ten to fifteen days. Currently, he is admitted to the Narayana Hospital in Bengaluru, Karnataka. The doctors there have proposed a Haplo match TCR Alpha/ Beta and CD 45RA depletion therapy, which would cost an estimated Rs. 38,80,000/- (Thirty-Eight Lakhs Eight Thousand Only)

Gulam works at a nearby shop and earns a meagre salary. He is the only breadwinner in the family. It is at this moment that the family needs support from generous donors like you. So please come forward and donate generously to the medical crowdfunding case.

ONGOING MEDICAL CASES

11. Zubia Sayed, 9 Years Fanconi Anemia

Little Zubia who is nine years old now suffers from coughing fits, seizures, severe pneumonia, severe weight loss, blood loss, and extreme body weakness. She is currently admitted to the Rainbow Children's Hospital in Hyderabad, Telangana. The doctors there have proposed a Haploidentical stem cell transplant (HSCT) support therapy, costing an estimated Rs. 25,00,000/- (Rupees Twenty Five Lakhs Only).

Zubia's parents, Mohd. Waseuzzama Sayed and Humera Khanam both belong to the lower middle-class category. Zubia's father used to work at a shop as a supervisor but lost his job due to COVID-19. It is extremely difficult for them to manage their living expenses at this moment. They live in a small dingy room on Balepir Beed, Maharashtra's outskirts. Moreover, little Zubia has two younger siblings. At this moment, the family needs support from generous donors like you. So please come forward and donate generously to the medical crowdfunding case.

12. Ashok, 17 Years Kidney Disease

Ashok is the 17-year-old son of Mr Mune Gowda and Mrs Nagaveni from Bengaluru, Karnataka. He was diagnosed with kidney disease when he was as young as three months old, and it only got worse from then. Ashok would frequently get sick, and suffer from high fever, weakness, and pain frequently. His home dialysis cycles started when he was very young. It got worse when he turned 10 years old, and his hospital dialysis cycles started three days a week.

The doctors at St. John's Medical College Hospital, Bengaluru, Karnataka have proposed a kidney transplant worth Rs. 10,00,000/- (Rupees Ten Lakhs only).

Mr. Mune Gowda is the sole breadwinner of the family who had to leave his minimum-paying work as a labourer three months ago because he met with an accident. The family has turned to you for help. Please don't let them down, they are living only on hope. Donate as much as you can and save Ashok.

ONGOING MEDICAL CASES

13. Dhruva, 6 Years Aplastic Anemia

The woes of Dhruva started when he started to develop a high fever. His parents ignored thinking that it was just a routine fever, but he started developing blood clots. They rushed him to Rainbow Children's Hospital, Hyderabad, Telangana where the doctors told them that Dhruva was suffering from Severe Aplastic Anemia. Doctors have said that he needs to undergo a Stem Cell Transplant, which would cost around Rs 16,00,000/- (Rupees Sixteen Lakhs Only).

Today, Dhruva is in the hospital and has to rely on antibiotics. His father, Prabhu, is the sole breadwinner of the family and works as a freelance graphic designer. His income range is something around Rs 10,000. Out of which Rs 4,000 goes to paying the house's rent. He has to manage his family of four, with whatever income is left with him.

He is completely powerless to help his son right now. Please come to the aid of Dhruva and save him.

14. Nasrin Parvin, 9 Years Thalassemia Major

It all started when Manuwara noticed that Nasrin's stomach had taken a grotesque structure due to swelling, and her eyes and skin were yellow. Their condition was beyond the means of their local doctor, so they had to take her to a bigger hospital. After undergoing a genetic test, it was confirmed that Nasrin was suffering from Thalassemia

Every month she has to go for blood transfusions, and she also has to undergo body tests after fixed intervals.

The entire financial burden of the family is carried out by Lal Mahammad, who works as a craftsman.

Doctors have said that Nasrin needs a bone marrow transplant, which will cost around 34,00,000/- (Rupees Thirty-Four Lakhs Only). Please save Nasrin from her gruesome disease, and allow her to live the carefree childhood she deserves.

ONGOING MEDICAL CASES

15. Anvika Pandit, 1 Year 5 Months Germ Cell Tumor

Anvika is a one-year-five-month-old baby girl. When Anvika was only nine months old, she was diagnosed with a Germ Cell Tumor. She lives with her parents, Mr Yogesh and Mrs Chitralkha in Shahapur, Maharashtra. Anvika underwent a biopsy (procedure to remove tissue) when she was one year old, but unfortunately, that was not the ultimate solution. After many chemotherapy sessions, the doctors at Fortis Hospital, Mumbai, Maharashtra have suggested surgery followed by multiple chemotherapy cycles. The estimated cost of the treatment is Rs. 9,75,000/- (Rupees Nine Lakhs Seventy-Five Thousand Only).

Anvika's father, the sole breadwinner in the family of five, earns a minimum salary that hardly covers their monthly expenses, much less the daily medications of his daughter. With time, medical expenses have exhausted Anvika's parents' savings. Now, they have no other source to get money, hence, they have turned to you for help. Please help the Pandit family in times of need and save their daughter.

16 Mohd Shazin K.P, 16 Years Thalassemia Major

Mohd. Shazin is the 16-year-old son of Mr. Abdul Gafoor and Mrs. Sahida hailing from Kannur, Kerala. Shazin was diagnosed with Thalassemia Major, a blood disorder when he was one year old. Since then, blood transfusions every two weeks have been necessary for him to survive. Shazin often falls sick with a high fever, cough, and cold, his body is growing weak and has to miss school and other activities most days. The doctors at Narayana Hospital, Bengaluru, Karnataka have proposed a Bone Marrow Transplant worth Rs. 25,00,000/- (Rupees Twenty-Five Lakhs Only).

Shazin's younger sister is the donor for the transplant but unfortunately, the excessively high cost of treatment is preventing them from moving ahead with the transplant. Shazin's father is a truck driver and earns Rs. 500/- a day. He is the sole breadwinner in the family of six. It is nearly impossible for Shazin's family to arrange such a huge amount. Please help the family to save their son. Any amount donated will push Shazin further towards a healthy life. Please help him.

ONGOING MEDICAL CASES

17. Satyam Potdar, 9 Years Leukemia

It all started two years ago when Satyam was taken down by a high fever, upon taking him to the doctors, they said that his platelet count was exponentially high. They asked the parents to take him to another hospital. It was there they found out that Satyam was suffering from Relapsed `B` Cell Acute Lymphoblastic Leukemia.

Every Alternate Day, Satyam has to go to Shri Siddhivinayak Ganapati Cancer Hospital in Miraj, Maharashtra for check-ups. According to the doctors, he needs to undergo an Allogenic Bone Marrow Transplant, which comes with a cost of Rs. 12,00,000/- (Rupees Twelve Lakhs Only). Ghanshyam works as a driver and only earns enough to feed his family of four. He has managed to pay the medical bills by taking loans. The only way Satyam can be saved is through your kindness and generosity.

Spare as much as you can for Satyam's sake and allow him to live a healthy childhood.

18. Pradnay Kodale, 10 Months Leukemia

It all started when Pradnay was taken down by a fever, which didn't recede even after antibiotics. Later, the infant developed swelling in his body. After undergoing numerous tests, it was discovered that he was suffering from blood cancer.

Pradnay's treatment would cost Rs 6,00,000/- (Rupees Six Lakhs Only). Pradnay's father earns a meagre income, out of which he has to pay for the expenses of his family of four. He has already spent one lakh rupees on his son's treatment by exhausting his savings and borrowing from his family members.

Right now, he is out of options and he has no choice but to turn to you for help. Please donate with an open heart for Pradnay's sake. Even if you can't donate, a share would be helpful as well.

BABY FEEDING CENTER

Child Help Foundation initiated the Baby Feeding Centre (BFC) program to address the need for private and hygienic spaces for mothers to breastfeed their infants in public buildings and spaces. The objective was to provide a safe and comfortable environment for breastfeeding mothers, promoting maternal and child health. BFCs were constructed across various hospitals and railway stations in Maharashtra, Bihar, and Kerala as part of the foundation's SDG3 program.

In Maharashtra, Child Help Foundation established three Baby Feeding Centers (BFCs) in collaboration with different organizations. The first BFC was inaugurated at Cama & Albless Hospitals on November 29th 2022, in partnership with Alkem Foundation. The second center was inaugurated at St. George's Hospital on December 9th 2022, in collaboration with IDBI Trusteeship. The third BFC was setup at Urban Health Centre in Bandra on March 23rd 2022, with the support of the IDBI Trusteeship. These BFCs aimed to provide private and hygienic spaces for breastfeeding mothers in hospitals, promoting maternal and child health in Maharashtra.

In Bihar, a BFC was inaugurated in 2019 at Katihar Railway Station, catering to the needs of breastfeeding mothers in the region.

In Kerala, BFCs were set up at Lakeshore Hospital, Ernakulam General Hospital, and Chottanikkara Temple. These centers

witnessed significant utilization, with a total average of 50 mothers benefiting from the three centers each day.

The implementation of BFCs in various locations aimed to ensure the safety and hygiene of infants and mothers, aligning with Child Help Foundation's focus on maternal and child care. The foundation plans to construct more Baby Feeding Centers across India to support the well-being of mothers and infants.

The total beneficiaries from Baby Feeding Centres constructed across India are 31,991

ROLE PLAY

Importance of Breast Feeding

Kurla Railway Station, Maharashtra

On August 24, 2022, a role-play on breastfeeding awareness was conducted at Kurla Railway Station in Mumbai, Maharashtra. The event aimed to raise awareness about the importance of breastfeeding and its benefits for infants and mothers. The role play was organized by the volunteers of Child Help Foundation (CHF).

The volunteers of CHF took part in the role play, portraying different scenarios related to breastfeeding. Through this creative and engaging approach, the objective was to educate and inform the public about the significance of breastfeeding in providing optimal nutrition and fostering the healthy development of infants.

By organizing the role play at Kurla Railway Station, a busy transportation hub, the event sought to reach a diverse audience and create awareness among commuters and passer-by about the benefits of breastfeeding. The goal was to encourage and support mothers in making informed choices regarding infant feeding practices.

The role play served as a means to spark conversations and engage with the public on the topic of breastfeeding, promoting understanding, and addressing any misconceptions on cultural barriers associated with it. Through the efforts of Child Help Foundation and its volunteers, this initiative aimed to contribute to the overall well-being of infants and mothers by promoting and advocating for

breastfeeding as the best start for a child's health and development.

The role play on breastfeeding awareness conducted at Kurla Railway Station had a direct impact on 30 beneficiaries. These beneficiaries, which include mothers, infants, families, and healthcare professionals, were able to personally engage with the event and gain valuable knowledge and support related to breastfeeding.

ROLE PLAY

Importance of Breast Feeding Cama Hospital, Maharashtra

During Breast Feeding Week, i.e. August 2nd to August 6th, 2022, Child Help Foundation (CHF) celebrated and promoted the importance of breastfeeding. On the final day of the week, CHF organized a role-play event at the Maternity Ward of Cama Hospital in Mumbai, Maharashtra, with the aim of raising awareness about breastfeeding in and around the baby feeding centre.

The role-play event involved a total of five participants who actively took part in portraying various scenarios related to breastfeeding and its benefits. The purpose was to educate and spread awareness among the attendees about the significance of breastfeeding for the health and well-being of infants.

The role-play event successfully reached out to approximately 30 beneficiaries, including new mothers and caregivers, who were present at the baby feeding centre. By showcasing different situations through role-play, the participants effectively conveyed the message of the importance of breastfeeding and provided practical insights into its benefits.

To acknowledge the participation and contribution of the participants, certificates were distributed to them as a token of appreciation for their involvement in the role play. This gesture aimed to recognize their efforts in promoting breastfeeding awareness and supporting the cause.

Overall, the role-play event organized by Child Help Foundation on the last day of Baby Feeding Week proved to be successful in spreading awareness about breastfeeding among the attendees at Cama Hospital. By educating and empowering individuals with knowledge about the advantages of breastfeeding, CHF continues to support and promote the well-being of infants and their families.

WORLD MENTAL HEALTH DAY CELEBRATION

Awareness Session

Jawhar and Dahanu, Maharashtra

On 10th September 2022, A Mental Health session was conducted in Boisar, Maharashtra. Ms Chris Shenoy and Ms Neha Singh, project team members, honoured the guests, Adv. Sayukta (advocate) and Vaishali Parmar (Clinical Psychologist). There was an intense need for spreading mental well-being among the students due to the suicide committed and attempts made by the students in ITDP Schools in Palghar District, Maharashtra. Vaishali Parmar presented a PowerPoint about the different types of counselling therapy, which was a guideline for teachers to understand the psychological thoughts of children. On the other hand, Adv Sayukta stressed the importance of intervention to focus on increasing suicide rates. She also explained what preventive measures can be taken. The participants were impressed by the knowledge of the guests and wished for more workshops in the future. The teachers and the superintendents felt the utmost need for the programme and considered this as guidance for intervening in this issue in the schools at their level.

Jawhar

Considering the dire need for mental health well-being in the ITDP Schools at Jawhar, Maharashtra to cater for the psychological needs of the students; another Mental Health Session was conducted in the month of September at Jawhar, Maharashtra. Ms. Meena Lokhande (POSH trainer) and

Mr. Subhash Pardesi (Asst. PO in ITDP) helped with the arrangement of the events. Adv. Sharada Shinde, Ms. Snehalata Athaide (Counsellor) and Ms. Shradha Shringarpure (Clinical Counsellor) were guests for the day. Adv. Sharada Shinde gave an excellent talk on the roles and responsibilities of schools when it comes to the prevention of suicide. While Ms. Snehalata lent her expertise to explain the warning signs of suicide and how to prevent it. Finally, Ms. Shradha Shringarpure relayed information about strategies to prevent suicide. The LTPCT Representatives, Mr. Shamuel and Dr. Kalyani Meshram also talked about this crucial topic. It was concluded that mental health awareness, regular camps and counselling support for students is of utmost importance.

PRADHAN MANTRI TB MUKT BHARAT

Ration Kit Distribution

Mulund, Maharashtra

On March 24th, 2023, World Tuberculosis Day, Child Help Foundation took a significant initiative to support 40 children in Mulund, Maharashtra who were affected by TB. In collaboration with the 'PradhanMantri TB MukT Bharat' campaign, Child Help Foundation became a Nikshay Mitra to provide assistance to these children.

As part of the initiative, 40 kits were distributed to the affected children. Each kit had a cost of Rs 600 and contained the following essential items:

Wheat Flour	2 kg
Rice	2 kg
Groundnut	500 gms
Tur Dal	500 gms
Moong Daal	500 gms
Jaggery	500 gms
Dates	250 gms
Groundnut/Sunflower Oil	1 litre
Rajma	250 gms
Red Gram (Lal Chana)	250 gms

The distribution of these kits aimed to provide comprehensive support to the children affected by TB, addressing their medical, nutritional, and educational needs. By becoming a Nikshay Mitra and joining the PradhanMantri TB MukT Bharat campaign, Child Help Foundation demonstrated its commitment to fighting tuberculosis and ensuring the well-being of the affected children.

Through this initiative, Child Help Foundation not only provided tangible support but also raised awareness about TB and encouraged the community to join the efforts to eliminate the disease. World Tuberculosis Day served as a significant platform to highlight the importance of early detection, proper treatment, and comprehensive support for individuals affected by TB.

STEP UP FOR BREAST FEEDING

Tata Mumbai Marathan 2022 Mumbai, Maharashtra

On 14th January 2023, the TATA Marathon event was held. Child Help Foundation team participated in Dream Run and Motivational Zone. It was decided that Child Help Foundation would promote Baby Feeding Centre during the TATA Marathon and the theme was finalized as 'Step up for Breast Feeding'. 53 members of CHF participated in the dream run and completed the run. They received medals after the event. In the Motivational zone, CHF was given a stage on Marine Drive. Several stage events were performed. There were dance performances, skits on breastfeeding, gender violence, and songs. Around 425 student volunteers joined the event from 6 colleges from Mumbai, Maharashtra.

The outcome of CHF's participation in the Motivational Zone was extraordinary. The stage events, coupled with the enthusiastic

participation of approximately 425 student volunteers from six colleges in Mumbai, Maharashtra created a significant impact. The performances sparked conversations, raised awareness, and inspired positive action among both the spectators and participants of the TATA Marathon event. CHF's dedication and creativity in addressing crucial social issues earned them the 1st Prize in the Motivational Zone, recognizing their outstanding contribution to the event and the cause.

UNITY AND DEDICATION

TCS World 10K Marathon

Bengaluru, Karnataka

The 14th edition of the TCS 10k Marathon took place in the month of May 2022 in Bengaluru, Karnataka, captivating the city with its ten-kilometre stretch. Child Help Foundation couldn't miss such an opportunity, and actively participated to showcase their principles and objectives.

Volunteers from Child Help Foundation enthusiastically joined the TCS 10k Marathon, dressed in black or blue jeans and vibrant yellow t-shirts, symbolizing their unity and dedication. With pride and passion, they marched forward,

holding placards that promoted the values and mission of Child Help Foundation. Their presence and efforts were appreciated and recognized, as each participant received a well-deserved medal.

Child Help Foundation cherishes such opportunities to raise awareness and draw attention to their noble cause. They eagerly anticipate future events where they can continue to make a meaningful impact and contribute to the betterment of society through their initiatives.

FEEDING DEVOTEES

Food Distribution

Jagnath Puri Rath Yatra, Odisha

On 1st July and 9th July 2022, Child Help Foundation and Filaantro, in collaboration with 40 dedicated volunteers, organized a commendable food distribution drive at Puri Community Center, Odisha. The aim of this initiative was to provide nourishment and sustenance to approximately 12,000 devotees. Nutritious meals were thoughtfully prepared and distributed, ensuring that the devotees received the necessary nourishment during their visit. The event showcased the spirit of compassion and generosity, as volunteers worked together to make a positive impact on the devotees. The food distribution drive brought smiles to the faces of the devotees, fostering a sense of unity, care, and support within the community.

SPREADING JOY

Distribution of Donuts by MOD (Mad Over Donuts)

Child Help Foundation, in collaboration with Mad Over Donuts, spread joy by distributing over 2,450 delicious Donuts to children across five locations: Mumbai, Bengaluru, Chennai, Pune, and Delhi. The children were thrilled to receive these delectable treats, and the soft bread and mouth-watering chocolate made for an irresistible combination. The children expressed their gratitude to Child Help Foundation and Mad Over Donuts for creating a memorable and delightful experience. This initiative truly made them "MAD" over the donuts, adding a touch of sweetness to their lives.

4 QUALITY
EDUCATION

SDG **QUALITY**
04 **EDUCATION**

13,333
Beneficiaries

QUALITY EDUCATION

According to the estimates of United Nations, without additional measures 84 million children will be out of school by 2030 and 300 million children will lack basic literacy and numeracy skills. Child Help Foundation is taking necessary steps to curb this danger. Through our efforts, we have helped 13,333 children receive education free of cost.

Child Care Institutions

Education plays a crucial role in the development of individuals and the progress of a nation. Child Help Foundation recognizes the significance of education and actively works towards providing primary education to economically disadvantaged sections of society through its 9 Child Care Institutes (CCIs) across the country. Through these efforts, the lives of 351 children have been positively impacted by receiving support for their education.

Child Help Foundation understands the importance of protecting children from any harm or adverse influences. Child Care Institutions serve as a social safety net, ensuring essential services such as emergency outreach, institutional care, family and community-based care, counselling, and support for underprivileged children. By providing a nurturing environment and opportunities for positive childhood experiences, the foundation strives to help children build their personalities and thrive.

The CCIs organize various activities throughout the year to engage and inspire the children. Special occasions like Teachers' Day, Women's Day, Republic Day, and Independence Day are celebrated with

enthusiasm. Drawing, Dance, Elocution competitions, and other educational and entertaining activities are conducted to promote the students' spirit and overall development. Additionally, awareness sessions on social issues such as early child marriages, child safety, mental health, and the importance of education are organized, empowering the children with knowledge and instilling important values.

Child Help Foundation's ultimate goal is to provide equal opportunities to all children, irrespective of their socio-economic background. It recognizes that many underprivileged children in India face barriers such as limited access to schools and a lack of parental support for education. By addressing these challenges, the foundation believes that education can serve as a transformative force, contributing to the nation's journey from a "Developing Nation" to a "Developed Nation." Through its commitment to education, Child Help Foundation aims to make a positive impact on the lives of underprivileged children and contribute to the overall progress of India.

Aadarsh Home for Orphan Children was supported until April 2022 and CHF started supporting Abhita Foundation from April 2022 onwards.

CCI SUCCESS STORIES

Name:
Priyanka Madhukar Belkar

School Name:
Murbad Ashram School
Village-Murbad
Taluka-Vikramgarh
District-Palghar

Class : 8th

Family Background

- The family consists of 4 members (Priyanka, Her mother and 2 Sisters)
- Priyanka doesn't have a father
- Her family has no financial support after her father's demise
- Her mother is a housewife
- Priyanka studied in an ashram school from the beginning

Student progress/achievement after project implementation

Priyanka got support in learning from qualified teachers of MOF projects in difficult subjects like Maths, Science, and English. Now Priyanka is fearless when approaching difficult subjects. With the guidance, help, and support received from the MOF project teachers, Priyanka improved her motivation level. She got 50.08% in the previous year in standard 7th and now this year in standard 8th her percentage is 75.60%. The extra-curricular activities undertaken by the project teachers and CHF staff gave Priyanka the confidence to participate in the activities. Now she is actively participating in various competitions, programs, and activities with her best performance

Name:
Nandini Ankush Khadke

School Name:
Murbad Ashram School
Village-Murbad
Taluka-Vikramgarh
District-Palghar

Class : 5th

Family Background

- Nandini's family consists of 6 members (Nandini, her parents, and 3 siblings).
- Total Family Income Rs. 400 per day
- Nandini's mother Smt Parwan Khadke works on their farm. They grow crops of Rice, Toor Daal and Nachani
- Nandini's father Shri. Ankush Khadke works as a helper in a carpet company called Responsive Company.

Student progress/achievement after project implementation

Through our programme, Nandini has shown great improvement in her academic performance. Her motivation levels have also increased, thanks to our trained and qualified teachers. With newfound confidence, we hope that Nandini attains more success in her future years.

CCI SUCCESS STORIES

Name:
Vinod Janu Chibhade

School Name:
Vangani Ashram School
Village - Murbad
Taluka - Jawhar
District - Palghar

Class : 10th

Family Background

- The family consists of 4 members (Vinod, His parents and his Sister)
- His father is a farmer and his mother is a housewife
- Vinod studied in an ashram school from the beginning

Student progress/achievement after project implementation

Because of easy tricks and ideas given by project teachers to solve subject-related questions, Vinod has started liking the subjects like Maths, Geometry, Science, and English. Because of the support of project teachers, Vinod can easily solve challenging questions and his confidence level has increased. Because of the strong support of project teachers, and the helpful, friendly and supportive environment maintained by them while teaching, Vinod now likes to come regularly to the school to attend the classes. There is progress in Vinod's studies as he got 60% on the third internal assessment test. The extra-curricular activities undertaken by the project teachers and CHF staff gave Vinod the confidence to participate in the activities.

Name:
Payal Suresh Hadal

School Name:
Ashram school Bhopoli
Vilshet Post - Bhopoli
Taluka - Vikramgarh
District - Palghar

Class : 10th

Family Background

- Her family consists of 5 members.
- Father and mother's occupation is farming.
- She is studying in 10th standard.

Student progress/achievement after project implementation

After getting support from trained and qualified teachers. Payal has shown a decreased fear of subjects like Maths and Science. Payal's motivation level has increased and her performance has shown significant improvement. Payal attained 92.80 per cent in her SSC board examination and was the topper from Bhopoli Ashram School. Payal has also started participating in sports and has improved her speaking skills.

ENHANCING THE LEARNING EXPERIENCE

Digital Classroom

Ms Neha Singh, Mr Krishnakanth, and Ms Nidhi (CHF volunteers) visited the Digital Classroom located at Kalyan, Maharashtra. During their visit, 40-50 students were present for the lecture. However, out of the three computers in the classroom, one of them wasn't functional. As a result, the students were utilizing the remaining two computers for their studies. The reason was the recent relocation of the centre to the village. This centre helps the students to be aware of Digital education. The total number of beneficiaries reached by CHF in this particular visit was 40-50 students.

EDUCATION SUPPORT

Scholarship support

Education plays a crucial role in empowering individuals and societies. It provides the opportunity for people to acquire knowledge, skills, and values that enable them to reach their full potential and become successful members of society.

Child Help Foundation ensures that the poorest children can continue their education. The organization provides inclusive, quality education. Every boy and girl in India has the right to quality education. Quality education reduces inequalities and promotes gender equality. Through Scholarship Support, Child Help Foundation helps students with their tuition fees. Following students were provided with scholarship support

EDUCATION SUPPORT AND STATIONERY KIT DISTRIBUTION

Education Support in Chennai

A Tuition Centre was conducted regularly in Chennai, Tamil Nadu for underprivileged children. These children were majorly from the slum pockets of Chennai who were unable to pay the normal tuition fees. As a token of appreciation for their performances in studies in spite of tough circumstances, on the 15th of July 2022, 81 underprivileged students were supported with stationeries viz. notebooks, files, pens, pencils, scales, and erasers in Chennai. The initiative was led by Mr Jagadhees, a project team member.

Tuition Classes in Bihar

Child Help Foundation supported a tuition centre run by Mr Ramvilas in Lalmanpatti, Supaul, Bihar. The age group of the children attending the centre is between 8 and 15. These children in the village are given the opportunity to attend extra classes near their place of stay. Classes are conducted in a space that is given for free by a well-wisher. The teacher teaches difficult subjects like Maths, Science and English. The classes are conducted in the morning from 6 to 9 am. Mr. Sharwan Kumar is a teacher who conducts the classes. These classes encourage children to go to school. The purpose of the tuition is to help the underprivileged children who are weak in the subjects. 43 students attended these classes.

EDUCATION SUPPORT AND STATIONERY KIT DISTRIBUTION

Mr Sharwan Kumar is a teacher who conducts tuition classes for underprivileged children in Sikrahata, Supaul, Bihar. The age group of the children is between 8 and 15. Classes are conducted in a rented place. The teacher teaches Mathematics, Hindi, English, and History to the children. A total of 50 children attend the classes on a regular basis.

School Bags Distribution Supaul, Bihar

1. Lalmanpatti, Supaul, Bihar.

14th September 2022

On 14th September 2022, 25 bags were distributed to the children in the village of Lalmanpatti, Supaul, Bihar, who attend tuition classes, as the parents were very poor and could not afford to buy school bags.

2. Sikrahata, Supaul, Bihar.

15th September 2022

On 15th September 2022, 25 bags were distributed to the children in the village of Sikrahata, Supaul, Bihar, who attend the tuition classes, as the parents were very poor and could not afford to buy school bags.

IMPROVING LEARNING OUTCOMES

Self Funded-CFE-Sakhare Ashram School & Bhopoli Ashram School

The CFE project was commenced in December 2018, with a need to improve the learning outcomes of the tribal students of Sakhare Ashram Shala. This project was about executing extra coaching in Maths, Science, and English. Thus resulting in better exam presentation and results in their board examination.

The project appointed external teachers for the main subjects who provided them with intensive coaching. The students were able to fare well in these difficult subjects, creating interest through various tools and techniques. The students were able to better grasp English, Maths, and Science subjects. This was possible with the support of Child Help Foundation, and Motilal Oswal Foundation (Corporate).

Nutanix-Sakhare Ashram School & Bhopoli Ashram School

Commenced in December 2018, the CFE project was designed to improve the learning outcomes of the tribal students of Sakhare Ashram Shala in Maharashtra. This project was about executing extra coaching in subjects like Maths, Science, and English.

External teachers were appointed for the main subjects and provided them with intensive coaching. The students were able to fare well in difficult subjects, creating interest through various tools and techniques. The students were able to better grasp the subjects. This was possible with the support of Child Help Foundation, Nutanix Technologies, and Motilal Oswal Foundation (Corporate).

MAKING EDUCATION FUN

Inauguration for Mini Science Center Pali & Murbad Ashram Shala

On 22nd April, the CHF team visited Pali and Murbad Ashram Shala, Maharashtra. Under our Quality Education Program, we inaugurated the Mini Science Center Project for the students from both schools. This was mainly done to provide them with exposure to advanced technology and equip them with skills to understand it. The event began with a "light-the-lamp" ceremony, followed by felicitating the chief guests Mr Chandrakant (Assistant PO) at Pali and Mr Arvind Bhoir (Assistant PO) at Murbad. Sweets and chocolates were also provided by the CHF team to the students and teachers who attended the event. We were fully supported by Samata Equal Footing Foundation in the success of this campaign.

Self Reliant India Initiative (S.R.I)- Nanhe Kalam Fellow

The Nanhe Kalam Initiative, implemented by Child Help Foundation (CHF), is a program focused on providing quality education and holistic development opportunities to underprivileged children.

In the Nanhe Kalam initiative, Child Help Foundation (CHF) has provided support to 10 fellows who are dedicated to teaching children in the 4th and 5th grades. These fellows play a crucial role in preparing the students for the Jawaharlal Entrance Test.

With the aim of providing quality education and increasing opportunities for the children, the 10 fellows have been actively engaged in teaching and mentoring the students. Their efforts have been focused on enhancing the students' knowledge, skills, and overall academic performance in preparation for the entrance examination.

Out of the 190 children who have benefited from these fellows, we are delighted to announce that 10 students from the program have successfully cleared the Jawaharlal Entrance Test. This achievement highlights the dedication and commitment of both the fellows and the students. This achievement will enable the students to have free Education till Class 12th.

The Nanhe Kalam initiative, through the support of CHF, has been instrumental in providing guidance, resources, and mentorship to these deserving students. The selection of these 10 students not only reflects their hard work but also

EDUCATION FAR AND WIDE

demonstrates the positive impact of the program on their educational journey.

Moving forward, CHF wants to remain dedicated to supporting the fellows and providing continued assistance to the students as they pursue their educational aspirations. We are confident that with our collective efforts, we can empower more children and pave the way for their future success.

Capacity Building Workshop in Schools, Dimapur, Nagaland

During the academic year 2022-2023, a workshop on Capacity Building in Schools for students was organised by Child Help Foundation in two schools by coordinator Yashika at the Dimapur Branch, Nagaland. Parents' meetings, Teachers' meetings, Outdoor activities related to learning word identification, art and craft activities, and School library set-up was conducted. As a result, the students have increased their interest in studies and have developed their language. This project was ended in the month of December 2022.

In the month of January 2023, a survey was conducted. The survey was preliminary work to launch the new project program with a special focus on the Government Primary School. It was to generate specific information from the target population or household, to involve the community in Children's Education, and to assess and evaluate the success and failure of the project. The survey through PRA exercises is conducted in a focused manner on specific themes such as Community Situation Analysis, Livelihood Analysis, Education and Local Services.

EDUCATIONAL KITS

Stationery Kit Distribution - Nagaland

The project is to build a core education team within CHF to work in a long-term and sustained manner with communities and schools to improve communities' commitment to education as well as the quality of education in Government Primary schools in Dimapur District of Nagaland. The team will focus on primary education, particularly on language and mathematics. The manner of teaching is through enjoyable learning. These methods of interactive learning were used to teach mathematics and language to 100 students at the Government Primary schools in the Dimapur District of Nagaland. Our volunteers also distributed stationery kits and school bags to the students in the month of September 2022.

IMPROVING COMMUNITIES' COMMITMENT TO EDUCATION

Education Project - Dimapur, Nagaland

In the month of January 2023, the Nagaland Centre for Human Development and Information Technology (NCHD-IT) planned a research-based analysis of the situation with PRA. This survey is preliminary work to launch a new project program with a special focus on the government primary school. It was to generate specific information from the target population or household, to involve the community in Children's Education, and to assess and evaluate the success and failure of the project. The Village Council and SMC showed a very positive acceptance and assurance of their participation in the project program. Parents' negligence of children's studies is because of their economic background wherein most parents work as daily wagers. Additional assistance in TLRM like digitization of the teaching systems will attract children.

The project was implemented to improve the Quality of Education in Government Primary Schools in Dimapur District. The objective is to make the community stakeholder responsible for children's education, to implement Experiential Learning in Schools, to stop dropouts, to improve learning and increase the motivation to attend school. Also that the manuals and curriculums are replicated by the teaching staff in the schools.

Observation and informal visits to families and interaction with families helped us to familiarize ourselves with the community members. The team also mapped the families' socioeconomic settings. It was found that 95% of families are daily wage earners, and the rest have petty shops like tailoring, vegetable vendors etc. They reached out to 50 parents and 70 children.

The reception to the program has been overall positive. Children and parents loved the initiative as it has been proven to be helpful in their learning experience.

ADDITIONAL EDUCATION SUPPORT

Summer Vacation Teaching

During the summer vacation period from 1st May 2022 to the 15th of June 2022, Child Help Foundation has implemented a program to provide additional educational support to students from Murbad, Wangani, Sakhare, and Bhopoli Schools in Maharashtra. This initiative aims to make productive use of the vacation time by offering various activities such as extra classes, home visits, student and parent counselling, family counselling, case studies, testimonials, and more. The Centre for Excellence teachers from Child Help Foundation have been deployed to different locations, including villages, field sites, and factory sites. They are conducting classes and educational sessions for students in their respective homes or any available spaces. The feedback received from both students and teachers indicates that the concept of summer vacation teaching has been beneficial and useful for enhancing the student's education. The additional classes during the vacation period provide students with an opportunity to strengthen their academic skills, revise important concepts, and explore new areas of knowledge. The personalized attention received through home visits allows teachers to better understand the individual learning needs of each student and tailor their teaching accordingly. Moreover, the counselling sessions for students and parents aim to address any academic or personal challenges they may be facing. By providing guidance and support, Child Help Foundation aims to empower both students

and their families to overcome obstacles and make informed decisions regarding their education. Additionally, case studies and testimonials may be conducted to highlight success stories and inspire other students. These activities showcase real-life examples of individuals who have overcome challenges and achieved academic success, serving as motivation for other students to strive for excellence. Overall, the summer vacation teaching program organized by Child Help Foundation aims to maximize the educational opportunities available to students during their break from regular school. By providing additional support, counselling, and engaging activities, the foundation aims to create a conducive learning environment and contribute to the holistic development of the students.

CULTURAL EVENTS

Balmela - Murbad Ashram School, Murbad, Maharashtra

On December 15 2022, a Bal-Mela was organized by Child Help Foundation at Murbad Ashram School for the students of class I to class X. During this mela, handicrafts made by school students were exhibited. Along with this, competitions like the Rangoli, Mehendi, and Face Painting competitions were conducted by the team of Child Help Foundation.

About 75 students participated in these competitions.

The grading process for selecting the winners was done by a team of teachers from Child Help Foundation and Murbad Ashram School. 3 winners of each competition were felicitated with gifts, trophies and certificates. At the end of the program, snacks were distributed, and students actively participated in the program. According to the feedback received from the school, the students enjoyed and liked the program very much.

CULTURAL EVENTS

Balmela - Vangani Ashram School, Murbad, Maharashtra

On December 27 2022, a Balmela was organized by Child Help Foundation at Vangani Ashram School, Maharashtra for the students of class I to class X. Competitions like the Rangoli competition, Mehndi competition, Face painting competition were conducted by the team of Child Help Foundation.

About 83 students participated in these competitions.

3 winners of each competition were felicitated with gifts, trophies and certificates. At the end of the program, snacks were distributed to all the students of Vangani Ashram School. According to the feedback received from the school, the students enjoyed and liked the program very much and were able to reflect on the social issues and culture that they are very much in touch with.

ENHANCING ACADEMIC PERFORMANCE

Motilal Oswal Foundation

The project is currently being implemented in the Government Ashram Schools of Murbad and Vangani in Maharashtra. Every year approx. 1200 students are benefiting from this centre. The project aims at providing extra classes in Math, Science, and English to the students of Std. 8th, 9th, and 10th. Through this project; training was conducted for the teachers on how to teach effectively with basic communication and practical skills.

The Teacher's Training Workshop, one of the objectives of the project, included the methods of creativity and activity-based teaching like showing documentaries related to the topic, having role-plays, and involving them in chart making. There are various methods of maintaining discipline in class and involving children in making rules to maintain discipline in class and planning for the lectures. The specialized trainers in education explained Bloom's taxonomy to the teachers and how they could implement it.

The inauguration of the project was conducted on 5th October 2021. Child Help Foundation with the support of MOF donated a television set and a water purifier to the school. Three new teachers are appointed for English, Maths and Science subjects who will be attending the school regularly and help students with extra coaching and brush up their basic knowledge on these subjects. They will also help the students to clear their doubts and will be teaching the students using activity methods.

SCHOOL DEVELOPMENT AND QUALITY EDUCATION PROJECT FOR TRIBAL ASHRAM SCHOOL, PALGHAR, MAHARASHTRA, INDIA

Improvement in Academic Performance- Individual and School

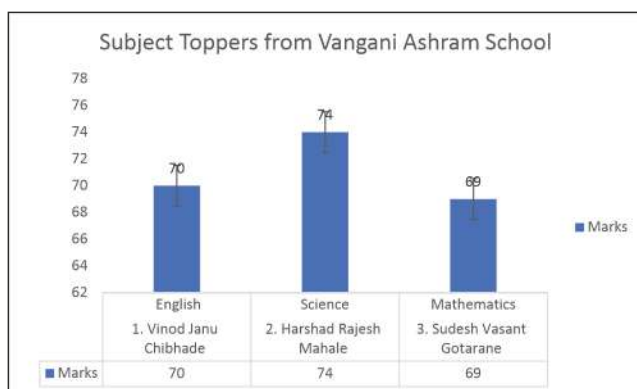

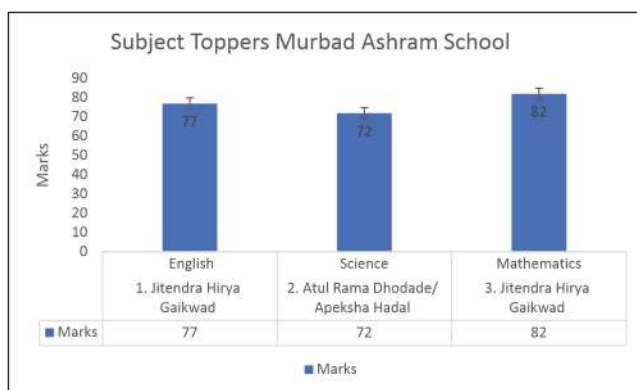

After the implementation of the MOF project in Wangani Ashram School, the performance of the school in the academic year 2022-2023 is 100% which was 47.54% earlier.

In Murbad Ashram School, the school performance in the academic year 2022-2023 is 90.10% which was earlier 79.35 %.

The individual performance of students in both Ashram schools for the academic year of 2022-2023 is significantly better

Earlier before the implementation of MOF project individual performance of students was between 60% to 70%, but now after the implementation of MOF project individual performance has increased above 70%

Increased performance in English, Mathematics, and Science. Students scored well in this subject

ENHANCING ACADEMIC PERFORMANCE

Post-COVID, schools have not recruited teachers for Maths, Science, and English. After implementing the MOF project, we appointed qualified and trained teachers for these subjects. Project teachers taught them during school hours and also during extra hours of school, as there were no teachers in the school during school hours. This had a positive effect on the student's studies and the students scored better in their exams.

Reduced the rate of dropout – Students got strong support from project teachers for easy learning. Also, the project teachers are very helpful, friendly, and supportive to the students. As a result, school dropout rates were reduced and regularity of attendance developed among students

Reduced Water Borne Diseases- A water purifier was donated to Murbad Ashram School under MOF project, as a result, water-borne diseases like Cholera, Typhoid, Diarrhoea, and Hepatitis A reduced, which affect positively on students' attendance.

Created awareness about menstrual health management among adolescent girls - Under the MOF project, there was an awareness session on MHM along with the distribution of sanitary pads in both ashram schools.

Mobile Booster & Digital Classroom Set-Up- Due to poor network connectivity in Vangani Ashram School, mobile boosters and digital classrooms were set up there. As a result, students used the facilities for their online studies post-Covid.

Home Tutorials were provided in summer and Diwali Vacations- During summer and Diwali vacations, MOF project teachers provided home tuition with the aim of imparting education without any gaps. The

initiative had a positive effect on students.

Increased participation in extracurricular activities -Extracurricular activities like children's gatherings, awareness sessions, celebrations of notable occasions, and competitions organized by project teachers had given students the confidence to participate in activities. Now students are actively participating in events, competitions, and activities with their best performance even in inter-school competitions.

Information and knowledge related to various concepts through awareness sessions -Awareness sessions were conducted in both ashram schools. Resulting that, students have gained information and knowledge about the prevention of COVID-19, Sexual Reproduction Health, HIV/AIDS, Child Labour Prohibition and Gender Equality.

2 ZERO HUNGER

SDG **ZERO**
02 **HUNGER**

6,57,000

Beneficiaries

Success Stories of Zero Hunger

Child Help Foundation works to decrease malnutrition among children and individuals, particularly in rural and urban regions. As a result, both hunger and child mortality will gradually decline. Child Help Foundation caters to feed children and serving them with a nutritious meal daily. Through Child Help Foundation's Zero Hunger Programme, 20,01,457 children have received assistance.

Devki a gifted child with exceptional leadership skills, receives vital support from Child Help Foundation's Roti Ghar. Despite challenging circumstances, she selflessly puts others first and demonstrates an unwavering spirit for living. Through Roti Ghar's provision of nutritious meals, Devki thrives and showcases her extraordinary talents. Her story showcases the transformative impact of support from nurturing initiatives like Roti Ghar

Najmin, a curious and outgoing 7th-grade student living in a slum, had a special love for physical education and sports. Despite her young age and challenging circumstances, she showed great affection and attentiveness towards learning in these areas. Child Help Foundation played a crucial role in supporting Najmin by ensuring she received meals from Roti Ghar, a community kitchen. Her dedication and enthusiasm became an inspiration for other children, proving that age and circumstances should never hinder one's passion for learning and achieving their dreams.

Success Stories of Zero Hunger

S. Raghava, Hyderabad

Raghava, a second-grade student at a government school, excels in sports like football, kabaddi, and carrom board. Despite his busy schedule, he consistently ranks first in his studies. With the support of Child Help Foundation's Roti Ghar, Raghava receives nutritious meals daily, fueling his success in both academics and sports. The foundation's assistance ensures his overall well-being and a promising future ahead.

Madhavi

Madhavi is a diligent 6th-grade student studying at a government school. She has a knack for sports and enthusiastically takes part in games like volleyball, carrom board, running, and a shuttlecock. In addition to her academic pursuits, Madhavi regularly visits the local Roti Ghar, where Child Help Foundation extends its support. Through their assistance, Madhavi receives nourishing meals and the necessary resources to excel in her studies. Her dedication and the backing of Child Help Foundation have enabled her to consistently achieve impressive academic results.

Sonali, Thane

Sonali, a curious and enthusiastic 12-year-old girl, possesses a deep love for reading, writing, and a strong desire to teach underprivileged slum children. She recognizes the value of education and dreams of becoming a teacher to make a difference in their lives. To support her journey, Child Help Foundation provides meals through the Roti Ghar program, ensuring Sonali's nourishment and enabling her to pursue her passion for learning and teaching.

Rohit

Rohit, an 8-year-old, is a mischievous but smart kid in 3rd grade. He is highly interested in games and sports and aspires to pursue his passion in the future. Understanding the importance of health, especially in challenging circumstances, Rohit aims to follow his interest and make a difference. Child Help Foundation supports him by providing meals through the Roti Ghar initiative.

GENDER EQUALITY

The power imbalance between a man and a woman can be blamed for all the woes faced by the daughters of our country. To decrease the power gap, Child Help Foundation has numerous programmes.

A total of 2,717 people benefited through our gender equality programme.

Self Defence Training – Murbad Ashram School, Murbad, Maharashtra

On August 26, 2022, in commemoration of National Women's Equality Day, a self-defence training and workshop took place at Murbad Ashram School in Maharashtra. The objective of the session was to empower and equip girl students from the 8th, 9th, and 10th standards with essential self-defence skills. The training was conducted by Ms Shilpa Lokhande, a member of the project team. The workshop saw active participation from the attending students, who eagerly engaged in the training activities. The session focused on teaching practical techniques and strategies for self-defence, including methods to protect oneself from potential threats and to respond effectively in challenging situations. The training aimed

to enhance the girls' confidence, awareness, and ability to protect themselves. The event witnessed a total of 136 beneficiaries, representing the number of students who benefitted from the training and workshop. By organizing the self-defence training on National Women's Equality Day, Child Help Foundation demonstrated its commitment to promoting gender equality and empowering young girls to assert their rights and safety. Such initiatives play a significant role in fostering a society where women can live with confidence, knowing they have the skills to protect themselves when necessary.

Guest facilitator for the Gender Equality Training: Ms. Linsa Elizabeth from TBZ.

MAKING WORKSPACE SAFE FOR WOMEN

POSH

Protection of Women from Sexual Harassment Act 2013, aka POSH, as the name suggests, is the legislation introduced by the Government of India to protect women from workplace harassment and empower them.

The legislature is aimed to prevent and prohibit sexual harassment. The intent of the law is to create a safe workplace for women without their integrity being impacted.

POSH gives confidence to women to participate in the workforce and the economy of a country, while at the same time achieving financial independence from their husbands.

Child Help Foundation is committed to the United Nation's SDG 5, and bringing about gender equity in society. Child Help Foundation has visited various corporations and imparted POSH sessions to the employees.

These sessions explain the basics of POSH, and its importance and teach the workforce basic norms and etiquette of behaving with a coworker.

These sessions have been impactful and always spark meaningful discussions in society and office spaces. With one session at a time, Child Help Foundation is trying to make this world a safer place for women and also helping them to strive for independence.

SDG 06 CLEAN WATER AND SANITATION

6,013 Beneficiaries

CLEAN WATER AND SANITATION

Diseases are rampant in areas where cleanliness is still a dream. For a healthy society, it is absolutely necessary for the surroundings to be clean. Child Help Foundation wants everyone to enjoy clean amenities.

Toilets have reached 100 more people and 994 people got access to clean drinking water in the year 2022-23. Sanitary napkins were also distributed to 2,105 girls in order to promote menstrual hygiene.

Toilet Construction, Odisha

In the month of May 2022, Child Help Foundation (CHF) embarked on a significant initiative to construct two toilets in Sahapur village, Odisha. The focus of this project was to address the pressing need for proper sanitation facilities for the girls studying at Hemachandra Sanskrit Vidyalaya. The construction of these toilets aimed to provide a safe and hygienic environment for the girls, ensuring their comfort and well-being.

Access to clean and functional toilets is not only a basic necessity but also plays a vital role in promoting good health and maintaining proper hygiene practices. CHF, in collaboration with local authorities and community members, successfully completed the construction of the toilets. The design and construction adhered to high-quality standards to ensure durability and functionality. The facilities were strategically located within the school premises, ensuring easy access for the girls.

The implementation of these toilets has had a profound impact on the lives of

approximately 100 beneficiaries, primarily the girl students of Hemachandra Sanskrit Vidyalaya. The provision of these facilities has significantly enhanced their educational experience by addressing a fundamental need that was previously lacking.

By having access to proper sanitation facilities, the girls can now attend school with greater confidence and comfort. They no longer need to worry about the lack of suitable restroom facilities, which often posed challenges to their health and hygiene. The construction of these toilets has empowered the girls to focus on their education without the distractions and discomfort associated with inadequate sanitation.

ELIMINATING TABOOS

Baseline survey on Menstrual Health Management (MHM) - Mumbai, Maharashtra

Project team member Ms Neha Y. Singh conducted a baseline survey on Menstrual Health Management (MHM). A total of 100 women participated in the survey event. The purpose of the survey was to understand the practice followed by women and girls during their periods. Whether they use sanitary pads during their cycle or clothes. Awareness and discussion sessions were also held to give a better understanding of sanitation and safe methods to be followed during menstruation. A survey form was filled out by the participants and the results were a 50/50 chance of women in the local communities using both pads as well as cloth during menstruation

Role Play on Menstrual Health Management Mumbai, Maharashtra

On 2nd July 2022, a role-play on menstrual health management was conducted. The skit was organized for the telecampaigners at Mira Road office in Maharashtra. Through the skit, they learned how to tie paper bags to securely dispose of sanitary napkins, preventing any discomfort or unhygienic situations. The exercise emphasized the significance of proper disposal in maintaining personal hygiene and a clean environment. Through this role play and exercise, the telecampaigners at the Mira Road office gained knowledge, practical skills, and empowerment to promote menstrual health management and educate others about the importance of proper disposal practices.

SAFE DRINKING WATER FOR ALL

Handover and Installation of Water Purifier

Child Help Foundation, under the Clean Water and Sanitation (WAS) project, has made significant efforts to provide access to clean drinking water in various locations across India.

These initiatives by Child Help Foundation have made a significant impact in improving access to clean drinking water in schools, promoting better health, and creating conducive learning environments for students. Child help foundation installed 6 water filter at 4 locations, Simanta Sanskrit Vidyalaya, Odisha, Uran School in Navi Mumbai, at Sangtamtila School, Dimapur, Nagaland, and Sahapur, Aluajharan, and Mahul in Odisha.

CREATING HYGIENIC ENVIRONMENT

Village Cleaning Activity - Sahapur, Odisha

Child Help Foundation, in collaboration with Hemachandra Sanskrit Vidyalaya, organized multiple village cleaning activities in Sahapur, Odisha over a period of 10 months from April to January. These initiatives involved 10-15 dedicated volunteers who actively cleaned community spaces and temple premises. The volunteers not only removed litter and debris but also provided proper instructions and guidance to villagers on maintaining cleanliness in their respective areas. Through these activities, the volunteers promoted cleanliness and hygiene while instilling a sense of responsibility in the villagers. These village cleaning activities exemplify the commitment of Child Help Foundation and Hemachandra Sanskrit Vidyalaya to fostering a clean and healthy environment for the community of Sahapur, Odisha.

Indian Swachhta League: Paper Bag Making - Bhopoli Ashram School, Bhopoli, Maharashtra

On 12th July 2022, project staff visited Bhopoli Ashram School in Maharashtra to conduct Paper Bag Activity. The activity was conducted with 8th, 9th and 10th grade students wherein there were (225 students). Teachers, The Principal, Nutanix Project Teachers and Volunteers took active participation in this activity. In this activity, the creation of multipurpose paper bags and bags for sanitary pad disposals was taught by Ms Shilpa Lokhande, Assistant Manager of Projects and Resource Mobilization. 225 paper bags out of old newspapers were made by students through this activity.

Child Help Foundation project team conducted a paper bag-making activity at the MBMC School in Mira Road, Maharashtra. The activity was conducted to create awareness amongst the 30 students about waste reduction and sustainability as a part of Child Help Foundation's 'Say No to Plastic' Initiative and as a support to the Indian Swachhta League.

VILLAGE DEVELOPMENT

India lives in an unfortunate state where certain regions are marred by inequity. While metropolitan cities like Mumbai, Delhi, Bengaluru, and Kolkata are booming with opportunities, there are some areas where people have to struggle for their daily bread. Most of these areas are given the term 'rural areas'.

Therefore it is necessary to make the villagers independent and help them to stand on their own two feet. Child Help Foundation understands the severity of this issue and has helped many villages. We have set up self-help groups, business centers, training sessions etc.

Through Village Development programme, Child Help Foundation aims to bring prosperity and development to the remotest

regions of India. We bring jobs, business opportunities and skill training to rural areas. In Gulabigaon (Bhintghar community), Nashik, Maharashtra, Child Help Foundation, along with IIFL Foundation, started a community development project last year. A thriving commercial hub called Bazaarhaat was later established to benefit the local people in several ways. The main advantage of this initiative is that it will give locals additional work chances. With the setting up of several shops in the business hub, people can start their own businesses and earn a livelihood. Additionally, the project also provides training and skill development programs to open up more employment opportunities. 2127 beneficiaries benefitted from this activity.

UPLIFTING THE DOWNTRODDEN

Inauguration of 10 Shops in Business Centre Bhintghar, Maharashtra

1. Branding – As per the guidelines received from IIFL, the branding of the Business Hub was done in February 2023. The name and logo of India Info line Limited and Child Help Foundation are mentioned on the four walls.

2. Start-up of Business Hub - The beneficiaries started their shops in their allotted spaces from 14 February 2023 onwards. Now they are selling bakery products, snacks, and medicines from their shops. Also, they are offering hair-cutting services from their shop. According to the feedback from the villagers, now they don't have to go to other villages or blocks to get haircuts and buy medicines. They are buying things from the shops of the business hub. The details of the beneficiaries and their shops are mentioned below-

SR. NO	NAME OF BENEFICIARIES	SHOP DETAILS
1	Savita Madhukar Jadhav	Tailoring
2	Yamuna Raghunath Jadhav	Bakery
3	Mirabai Ramdas Jadhav	Salon
4	Shanta Subhash Pawar	Beauty Parlour
5	Bheema Ramdas Kadali	Chilli Grinding Shop
6	Kamal Ramesh Malghare	Cutlery Store
7	Ambibai Abaji Kadali	Snacks Store
8	Manjibai Ramdas Jadhav	Medical and General Store
9	Shevanta Jaywant Kadali	Grocery Store
10	Yashoda Ramesh Jadhav	Tea Stall & Products Made by Gaushala

Skill Development Training: Dairy Products Bhintghar, Maharashtra

Child Help Foundation had organized skill development training at Gulabi village for 26 women. During training for skill development they learned how to make milk Products such as paneer, Gulab jamun, Pada, Curd, ghee, Barfi Chaas, Basunti etc . Women were happy and they were thankful to Child Help Foundation Team.

EMPOWERING THE POOR

Skill Development Training: Lantern Making

On 13th and 14th November 2022, Child Help Foundation organized Skill Development Training on Lantern Making with the help of India Info Line Foundation. Cloth and canvas lantern making was taught by resource person Mrs Meenakshi Jagtap. It includes large-size and small-size dresses and canvas lanterns with various patterns created by our project beneficiaries. A total of 25 women attended the training and during the training, women beneficiaries produced 9 large-size and 21 small-size lanterns. According to their feedback, they liked this training because they can easily do it at their home

Awareness Session: Personal Health & Hygiene

Bhintghar, Maharashtra

On 10th November 2022, a session on Health and Hygiene was conducted by Ms Chris Shenoy at Gulabigaon, Nasik, Maharashtra with the female beneficiaries. The session included information about maintaining proper cleanliness, which will help to keep them healthy and be mindful of their personal hygiene. The session was extremely informative and helpful, and the attendees were very happy to be a part of such a session.

EMPOWERING THE POOR

Skill Development Training: Cloth Bags Making Bhintghar, Maharashtra

On 11th November 2022, Child Help Foundation organized workshop on Cloth Bag Making with the help of India Info Line Foundation. Using a simple technique of making cloth bags from old cloth taught by project team member Shilpa Lokhande. Some beneficiaries used tailoring machines for stitching work while some beneficiaries did hand stitching. It includes cloth bags of various sizes. The participants used their creativity and skills to create the bags. Simple techniques and measurement pattern have been provided by project team member. A total of 10 women attended the training and 16 cloth bags were produced by the women beneficiaries during the training. According to their feedback, they like the training and need to visit the factory to sharpen their skills.

Awareness Session on De - Addiction & Donation of Football and Volleyball Bhintghar, Maharashtra

Overcoming addiction can be difficult, constant help and guidance are needed by addicts. Child Help Foundation with funding partner, India Info Line Foundation, organized an awareness session on De-Addiction at Gulabigao (Bhintghar), Surgana, Nashik, Maharashtra on 3rd December 2022. The session was conducted in the presence of Mr N. D. Gavit, (OSD) Officer on Special Duty, Tribal Development, Mr Raghunath Jadhav, Sarpanch, Mr Kuber Popati and Police Patil. The Resource Person, Mr Vikrant Lokhande (Master in Globalization and Labor-TISS), Superintendent of De-Addiction Centre, Support, Saphale conducted the session using real-life examples and experience. In the session, they covered the points related to the side effects of addiction on their personal health and on their families. At the end of the session vote of thanks was given by Mr N.D. Gavit, and Mr Kuber Popati for organizing the important session in the village as there is an extreme need for a De-Addiction session in the village. In the end, volleyball and football were donated to their respective team. Villagers felt very thankful for this donation and committed to making proper use of this sports equipment.

TRANSFORMING VILLAGE ECONOMIES

Bazaarhaat

Bhintghar, Maharashtra

A weekly market was started on 4th December 2022 with the cooperation of the villagers at Bhintghar (Gulabigaon), Taluka-Surgana, District-Nashik, State-Maharashtra. Villagers took the initiative to create public awareness about the business hub of Child Help Foundation. Bazaarhat was planned in the upper ground of the Business Hub. The beneficiaries of the IIFL project put up their stalls in the market which consisted of snacks, clothes, vegetables, groceries, cutlery, dry fish, and grains. There were around 50 stalls. More than 200 customers shopped in Bazaarhaat. An approximate amount of Rs. 20,000 was traded in this market.

HUMANITARIAN RELIEF

Nature is unpredictable. When everything seems perfect, calamity can strike and ruin everything in a stroke. It is during this time, that human kindness is needed more than ever. Child Help Foundation (CHF) strongly supports Humanitarian Relief Initiatives and reaches out to affected people in calamity emergency situations. Child Help Foundation has been at the forefront of relief efforts during natural calamities. At such times, Child Help Foundation staff and volunteers, work tirelessly across the several states of India to where aid and assistance are most needed.

Child Help Foundation has helped 1,824 people during natural calamities.

Assam

After the dreadful floods in Assam in 2022, Child Help Foundation along with Raindrop Foundation volunteers catered for the affected people in Nalbari, Changsari, Kamrup, and Darrang Districts in Assam with flood relief kits. The distribution was in collaboration with Bernil Pratyasha Foundation. 420 families were helped with flood relief kits that included rice, masoor dal, potatoes, mustard oil, soybeans, salt, poha, muri, Dettol soap, bleaching powder, and sanitary napkins to take care of their nutrition intake during those tough times. In Silchar District of Assam, 1000 flood-affected families were given ration kits. This initiative was in collaboration with CCHRC (Cachar Cancer Hospital and Research Centre). Groceries like rice, dal, oil, and salt were distributed to the families.

AT THE FOREFRONT OF RELIEF EFFORTS

Uttarakhand

The devastating floods that occurred in Uttarakhand in September 2022 caused immense suffering and loss for the affected people. In response to this crisis, Child Help Foundation, in collaboration with India Cares and the local administration, stepped forward to provide much-needed support.

One of the crucial forms of assistance provided was the distribution of ration kits to the shelter team. These kits contained essential food items and other supplies that helped address the immediate nutritional needs of the flood-affected families. By ensuring that these families had access to basic nutrition, Child Help Foundation, India Cares, and the local administration played a significant role in providing relief during this challenging time. In addition to ration kits, the assistance provided also included sanitation support. Child Help Foundation contributed to their overall well-being and helped create a safer environment for them. Through these combined efforts, many families were able to receive the necessary support to meet their basic needs and rebuild their lives after the devastating floods.

Maharashtra

November 2022 was highly challenging for Maharashtra with cold waves hitting the state. A blanket distribution drive organized by Child Help Foundation and led by Mr Ajit Nair, Regional Coordinator of Mumbai and Pune was conducted, where 35 girl children of Anugraha Seva Mandal, Ambernath, were given blankets to protect them from chilly winters and keep them safe. Ration kits were distributed to specially-abled, and older people and widows in the Mashcha Pada community. 64 ration kits were distributed to help them with their basic nutritional needs. 63 underprivileged women in Kalyan, Maharashtra were given blankets to stay warm during winter.

DISTRIBUTING RELIEF KITS

Bengaluru

Child Help Foundation, in collaboration with Zivame under their CSR program, distributed grocery kits to children at Sneha Orphanage, Bengaluru. Similarly, specially-abled and older citizens who are in the golden years of their lives were given ration kits to support their daily nutritional needs and well-being, these rations would be helpful to provide them sustenance and safety. When given the goodies, a ray of hope shone in their eyes with a sense of assurance and security. Child Help Foundation is always ready to serve society in these manners.

Kerala

Child Help Foundation team members on December 21, 2022, distributed blankets to the tribal people of Kumali, Kerala. The collaboration with the Kumali Panchayat to address the needs of the people during the chilly winters showcases a collective approach towards community welfare. The distribution of blankets is a significant gesture of care and support, especially in regions where the winter season can be harsh. The gratitude expressed by the people for this initiative reflects the positive impact it had on their lives.

EMPOWERING THE DISABLED

Telangana

On December 3 2022, an event for blanket distribution was organized at the Physically Handicapped Colony in Pocharam, Medchal-Malkangiri District, Telangana. The initiative was conducted in collaboration between Muthoot M George Foundation and Child Help Foundation (CHF).

Mr Neeli, along with seven team members from Child Help Foundation, participated in the program. The primary objective of the event was to provide support and warmth to the physically disabled parents residing in the colony. A total of 100 blankets were distributed to them, ensuring that they have the necessary protection against the cold weather.

In addition to the blanket distribution, the event also aimed to bring joy to the children living in the colony. As part of the initiative, 50 toys were distributed among the children, offering them a source of amusement and play.

Moreover, to create a pleasant and inclusive atmosphere during the event, snacks were distributed to approximately 200 people in attendance, this provided a delightful experience for all the participants, fostering a sense of community and care.

The collaborative efforts between Muthoot M George Foundation and Child Help Foundation in organizing this blanket distribution event exemplified their

commitment to support physically disabled individuals and their families. By providing blankets, toys, and snacks, the event aimed to bring warmth, happiness, and a sense of togetherness within the Physically Handicapped Colony, promoting their well-being and enhancing their quality of life.

FLOOD RELIEF

Distribution of Grocery and Nutrient Product, Kamrup, Assam

On 23rd July 2022, a collaboration between Child Help Foundation and Bernil Pratyasha Foundation was done to provide assistance to flood-affected families in Changsari, Kamrup District, Assam. The distribution of groceries and nutrient products to the affected families was done

By providing essential items such as rice, dal, oil, salt, milk, Horlicks, biscuits, and Maggi, Child Help Foundation and the Bernil Pratyasha Foundation helped to address the immediate needs of the flood-affected families. These provisions contribute to ensuring food security and meeting nutritional requirements, especially for vulnerable populations. Supporting 40 families in the Kamrup district showcases the impact and reach of this initiative.

Flood Relief, Assam, Nalbari district and Darrang District

Child Help Foundation volunteers actively participated in flood relief efforts for Nalbari and Darrang Districts of Assam. By engaging in relief activities, Child Help Foundation volunteers contribute to alleviating the suffering and providing support to those in need. The distribution of food relief items showcases the commitment of the volunteers to ensure that affected individuals and families have access to essential sustenance. Their efforts go a long way in providing some relief during such challenging times. The work of Child Help Foundation volunteers demonstrates solidarity and compassion towards the affected communities in Nalbari and Darrang Districts.

LIFE BELOW WATER

Beaches have lost their pristine beauty because of human activity. Instead of sand, one can find heaps of trash. With the help of corporations, other NGOs and volunteers, Child Help Foundation has conducted numerous beach clean-ups. We hope that our efforts will inspire others to rise up and fight for these innocent marine lives, and in turn, create a safe environment for these voiceless swimmers.

Through these beach clean-ups, Child Help Foundation has picked up 54,346 kilograms of trash and saved 16,30,380 marine animals. We would like to thank everyone who helped us in our efforts to make our beaches clean.

DAAN UTSAV 2022-23

During Daan Utsav Week, an annual celebration of Child Help Foundation, a program was organized on October 2, 2022. As part of this event, paper bags created by students from Ashram schools were distributed to small shopkeepers in the market area of Jangid Estate, Mira Road, Maharashtra. These paper bags, made from recycled newspapers, aimed to promote the use of eco-friendly alternatives to single-use plastic bags. The initiative had a significant impact and received positive feedback from both the community and shopkeepers.

Additionally, as part of the Daan Utsav Week activities, project team member, of Child Help Foundation, provided stationery items to 100 children at Shri Gauri Kedia School in Andheri, Mumbai, Maharashtra. This gesture aimed to support the holistic development of the children and contribute to their educational journey.

FOUNDATION DAY 12TH ANNIVERSARY CELEBRATION

FOUNDATION DAY 12TH ANNIVERSARY CELEBRATION

12th Anniversary Celebration Celebration of Child Help Foundation

On November 19th 2022, Child Help Foundation joyfully celebrated its 12th Anniversary at all branches across India. The event was marked by an atmosphere of enthusiasm and gratitude among the members of the organization. The celebration commenced with inspiring speeches and expressions of appreciation from the Trustees and the Management, who acknowledged the dedication and hard work of the volunteers. To commemorate the occasion, flashblack videos were screened, highlighting the remarkable efforts and contributions of the volunteers. Those who had demonstrated long-term commitment and outstanding performance were recognized and awarded under various categories such as "Ninja Warriors," "Rising Stars," and "Zesty Flag Bearers." This recognition served as a mark of appreciation for their exceptional achievements. During the celebration, achievers from each branch and senior staff members were given the opportunity to share their experiences. This allowed for a collective reflection on the impact and growth of the organization over the years. Their stories served as an inspiration and motivation for all present, reminding them of the importance of their work in making a difference in the lives of those in need. In addition to the speeches and recognitions, customised songs of Child Help Foundation were played, creating a sense of unity and pride among the attendees. The anniversary celebration also included a cake-cutting ceremony, symbolizing the milestones achieved by the organization in its journey of serving the community. Snacks were distributed, adding to the festive atmosphere and fostering camaraderie among the

participants. The 12th Anniversary celebration of Child Help Foundation was a significant milestone, providing an opportunity to reflect on the accomplishments and growth of the organization. It served as a testament to the collective efforts and unwavering commitment of the volunteers, staff, and supporters who have contributed to the Foundation's mission over the years. This celebration not only honoured the achievements of the past but also served as a catalyst for continued dedication and service towards the betterment of society. This reinforced the organization's core values, inspired unity, and highlighted the importance of collaboration in making a positive impact on the lives of those in need. Child Help Foundation's 12th Anniversary celebration was a time of reflection, gratitude, and renewed commitment to the cause of helping those in need. It reminded everyone involved of the significant role they play in transforming lives and creating a brighter future for the communities they serve.

IMPARTING VALUES TO CHILDREN

Child for Child Program

Child Help Foundation, through its Child For Child program, has been working for nearly 7 years to positively engage school children from across the country and imbibe in them positive human values, helping them understand the importance of growing up as responsible and conscious citizens of the country.

The Child for Child team also initiated dialogue and discussions with parents, teachers, principals and educators across the country to help recreate a supportive

environment for children as well as caregivers, as they navigate the adverse impact of the pandemic.

More than 600 value education sessions were conducted with more than 900 schools pan India under these sessions. Children are sensitised to various causes and value systems and made to understand the importance of growing up as empathetic human beings and responsible citizens of the country.

To engage young minds, stories and lessons are shared from the lives of inspiring change-makers.

TO WHOMSOEVER IT MAY CONCERN

I take the opportunity to extend my appreciation to the noble leaders of Child Help Foundation for the exemplary work that the organization has undertaken in the social sector.

It is indeed a great feat to have saved lives of 2000 children in state who have been suffering from the increasing incidence of COVID and Malaria disease globally. Also, during COVID, the support rendered to the needy by providing breathing (PPE) kits, sanitizers, masks, oxygen cylinders and oxygen concentrators to the families without any hesitation is very commendable.

It is gratifying to note that Child Help Foundation is working in haste for the infrastructure and livelihood development project for the villages of Bhongir, the District of Sangli Taluka of Maharashtra District in Maharashtra.

Congratulations to Child Help Foundation for successfully completing Direct Train of Operation and Strong Smile to Silver (Ain) Schemes covering 12 UN Sustainable Development Goals.

Wishing the Extra Years to Child Help Foundation All the Best in Future Endeavour!

Certificate of Appreciation

This certificate acknowledges the 'Child Help Foundation' is a commendable organization dedicated to assisting children who require medical attention. We present this Certificate of Appreciation to Child Help Foundation in recognition of their ongoing commitment to saving the lives of children facing critical illnesses. The provision of essential medical emergency and financial support to these underprivileged children through our hospital network is truly commendable. We extend our gratitude for your generous contribution in this field.

We extend our best wishes to Child Help Foundation for all their future endeavours and encourage them to continue their excellent work.

Thank you again for your support.

To: Child Help Foundation

Letter of Appreciation issued to Child Help Foundation

This letter is issued to Child Help Foundation in appreciation of the tireless and dedicated efforts of Child Help Foundation in providing financial support for seeking medical treatment for financially underprivileged children.

We take this opportunity to thank you and express our sincere gratitude for your ongoing and consistent financial support for the needy children awaiting treatment at KIMSHEALTH.

We are pleased to associate with Child Help Foundation and looking forward to a long term synergy and we are after additional medical care and attention for many more children awaiting treatment and financial support for their health.

With Regards,

Certificate of Appreciation

This Certificate of Appreciation is given to CHILD HELP FOUNDATION in recognition of their continuous efforts of saving lives of children suffering from critical illnesses. The financial and medical emergency support extended to these underprivileged children in various ways through our hospital is highly appreciated.

On behalf of the entire team of doctors, nursing staff and support staff, I would like to take this opportunity to express our sincere gratitude for the timely financial and medical support extended to the patients (and their families) who are facing financial hardship in seeking the treatment and medical care. We thank your team members for providing such kind support and being so efficient while patients and the family members await care.

Looking forward to continue our association and support for your patients.

With Regards,
