About Us *Newsletter*

Child Help Foundation (CHF) is a pan-India non-profit organization, registered under the Bombay Public Trust Act 1950, which started in the year 2010. We aim to accomplish the objectives set by the United Nations Sustainable Development Goals (UN SDGs) for global development. Child Help Foundation's principal purpose is to empower the disadvantaged holistically with some of our initiatives like Emergency Medical Support, Education, Clean Water and Sanitation, Gender Equality, Zero Hunger, Humanitarian Relief, and Village Development.

Inauguration of Computer Lab at Tailika Balika Vidyalaya to Empower Underprivileged Girls with Digital Learning

Newsletter

Child Help Foundation took a significant step forward in its mission to provide quality education to underprivileged girls with the inauguration of a Computer Lab at Tailika Balika Vidyalaya in Barbigha, Bihar. The event was graced by the esteemed presence of Dr. Poonam Sharma, Independent Director of National Fertilizers Limited, who served as the Chief Guest.

The newly inaugurated Computer Lab is a testament to the NFL's commitment to offering hands-on digital learning experiences to girls between 9th and 12th standard. With the rapid advancement of technology, access to digital education is paramount in shaping the future of young minds, especially those from marginalized backgrounds.

The journey towards establishing the Computer Lab began in December with meticulous planning and preparation. The room underwent extensive cleaning and painting to create an optimal learning environment. By the first week of January, the furniture and computer systems were installed, marking the successful completion of the setup process.

The project aims to bridge the digital divide by providing girls with the necessary tools and resources to excel in an increasingly digitized world. Alongside the inauguration of the Computer Lab, a dedicated Computer Teacher was appointed in January 2024 to facilitate effective learning experiences for the students.

Expressing his enthusiasm for the project, Mr Shaji Varghese said, "We are thrilled to inaugurate the Computer Lab at Tailika Balika Vidyalaya, a significant milestone in our ongoing efforts to empower young girls through education. With access to modern technology and dedicated guidance from the Computer Teacher, we aim to equip the girls with the digital skills necessary to succeed in the 21st century."

The inauguration ceremony witnessed the joy and excitement of students and teachers alike as they embarked on a new chapter of learning and exploration in the realm of digital education.

Pawani Jain
Liver Complications

Scarred Livers Places Pawani in Peril, Please Save the Young Soul

"We were so happy with the birth of our first child. Wishes came pouring from every corner of our family and everyone extended their blessings. But within a month, the joy that came with the arrival of the child perished in an instant. Misery and gloom clouded over our house, but the biggest fear was not knowing what would happen next to our child." Vineet Jain ; (Father)

It was a moment of joy when Vineet and Neha brought their newborn baby, Pawani, to their house in Ashok Nagar, Madhya Pradesh. But when the parents noticed little to no growth in the baby even after a month, they suspected something was wrong.

It was confirmed that little Pawani is suffering from Biliary Atresia with Failed Kasai Protoenterostomy (End-Stage Liver Disease). She constantly sweats and her growth is little to none. According to the doctors at Maharashtra's Nanavati Max Super Speciality Hospital (4.9 km from Bandra Railway Station), Pawani can only be saved through a liver transplantation.

Pawani's mother, Neha, has agreed to be a donor, only the funds are remaining. But the cost of the treatment is coming at Rs. 16, 50,000/- (Rupees Sixteen Lakh Fifty Thousand Only).

Vineet lives with a joint family. The family depends on the income earned from a betel leaf shop. But the shop doesn't generate enough revenue to pay the medical bills. Vineet has taken some help from his friends, but it hasn't been enough.

Please save this little girl from misery. Donate as much as you can and share the fundraiser with all your friends and family members.

There are many more children who need urgent treatments, and your small contributions can make a huge difference. [Please Donate!](#)

Muhammed Shazin

After enduring years of hardship, Muhammed Shazin is finally free from his condition. The miracle was only possible through the selfless efforts of donors of Child Help Foundation, who went beyond their way to ensure that Muhammed Shazin could see the light of the day and get his due treatment.

Joel Dhanphul

Joel Dhanpul finally kisses goodbye to recurring aplastic anaemia. His recovery was aided by our dear donors who donated to provide him with the support he needed. Today, Joel looks forward to living his life and fulfilling his dreams to aid his family in the future.

Muhammed Faiz

Muhammed Faiz was suffering from hydrocephalus and his pain caused him intense misery. His father was a sweet reseller and could not afford the surgery. Seeking help, he approached Child Help Foundation. After the necessary verification, the donors raised money for the child and saved him from further harm.

Anamika

Performing daily chores and tasks became extremely difficult for Anamika as she was suffering from scoliosis. She wanted to study and help her family escape poverty, but her condition depleted her hopes. The donors of Child Help Foundation provided her hope and made sure that she gets to fulfil her dreams one day.

Success Stories Newsletter

Before After

Hasmita

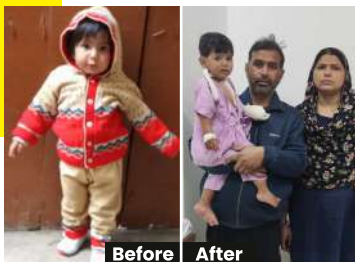

Despite barely being able to walk, Little Hasmita showed immense strength and bravery in her battle against heart disease. Her strength was further enhanced by the love and support of the donors of Child Help Foundation, who helped her through donations and shares. The family of Hasmita is immensely grateful for the help.

Before After

Haniya

Baby Haniya had a hole in her heart that made each day pass with pain and misery. She struggled with feeding and breathing and experienced excessive sweating and a rapid heartbeat. Haniya's family was poor and approached Child Help Foundation for help. The donors then helped the family to raise money for the treatment and the rest is history.

Before After

Heeba

After experiencing illness, fevers and pneumonia, Heeba's parents were horrified to learn that their daughter had a weak heart. All doors seemed closed, as the parents had no way of paying for the treatment. When all hope seemed lost, the parents approached Child Help Foundation. Their hope was warranted as donors helped them to raise money for the treatment and saved Heeba from the clutches of her disease.

Before After

Somala

For more than 10 years, comfort remained a distant stranger for Somala; who had been experiencing heart complications since her birth. Fever, suffocation, and chest pain became as common as breathing for the child. However, she can finally rest free as the donors of Child Help Foundation helped her to experience ease and comfort for the first time. Somala can finally rest easy and look forward to living her life.

Shifa Maryam

Shifa Maryam, a nine-month-old child, was left immobilized due to her cancer, which caused her legs to be paralyzed. Her parents were haunted by the thought of their daughter living a life of a cripple. Fortunately, their worries have been put to rest as Shifa is free from cancer, thanks to the efforts put forth by our selfless donors.

Baby of Renuka

The hopes and happiness of Renuka and Prabhu were crushed when their child was born with multiple complications. The child required a ventilator and treatment with an exorbitant price tag. The family had no way of paying for the treatment and thus reached out to Child Help Foundation. With the support of donors, Renuka and Prabhu were able to arrange for the treatment of their baby.

Anushka

Visits to the hospital became extremely common for little Anushka, who was battling an intense and painful heart disease. Her father worked as a helper in the shop and was having a hard time arranging money for the treatment. But thanks to our donors, Anushka doesn't have to visit the hospital anymore and is living the childhood she deserves.

Saras Khare

The joys of childhood were completely unknown to Saras Khare, as a little bit of playtime left him completely exhausted. His heart condition caused him intense fatigue. But today, Saras Khare can play as much he wants as his heart no longer troubles him. The miracle was only possible due to the support provided by the donors of Child Help Foundation.

Pratham Hanabar

Today, Pratham lives life to the fullest. But that was not the case a couple of months ago as his life was plagued due to scoliosis. His parents approached Child Help Foundation for help. After the necessary verification, the donors supported him for treatment and the rest is history.

The Importance of Play Therapy For Children *Newsletter*

In childhood, where imagination reigns supreme and emotions run wild, the significance of play cannot be overstated. Play therapy, a specialized form of therapy tailored to children's unique needs serves as a powerful tool in nurturing their mental health and emotional well-being. In this blog, we delve into the importance of play therapy and its impact on children's mental health.

Understanding Play Therapy

Play therapy operates on the fundamental principle that play is the natural language of children. Through play, children express their thoughts, feelings, and experiences in a nonverbal manner, often revealing insights that they might struggle to articulate verbally. Play therapy provides a safe and supportive environment where children can explore, process, and make sense of their inner world. In general, there are two main types of techniques used by therapists:

Directive Play Therapy: In directive play therapy, the therapist actively engages with the child, guiding them through structured play activities to facilitate self-expression. This involves offering clear instructions and closely monitoring the child's participation throughout the process.

Non-directive Play Therapy: In non-directive play therapy, the therapist creates a more open and unstructured setting. Here, the child is encouraged to freely explore various play activities, allowing them to express themselves with minimal intervention from the therapist.

Techniques Used in Play Therapy

Play therapy encompasses a variety of techniques tailored to meet the unique needs of each child. The choice of technique in a therapy session is largely dictated by the child's preferences and therapeutic requirements.

Typically spanning 30 to 45 minutes, a play therapy session begins with the therapist establishing a secure and welcoming environment for the child to engage in play. Throughout the session, the therapist observes the child's interactions with the provided toys, gauging their expressions and behaviours.

As the child grows accustomed to the therapy space, the therapist gradually introduces more targeted play activities designed to address the specific challenges the child faces. Some widely utilized techniques in play therapy worldwide include:

Inauguration of Baby Feeding Center

**Late Krantisingh Nana Patil Civil Hospital,
Satara, Maharashtra**

On 9th February 2024, Child Help Foundation team went to Late Krantisingh Nana Patil Civil Hospital, Satara for the Inauguration program of Baby Feeding Centre. Mr Jugender Singh (Trustee-Child Help Foundation) and other volunteers of Child Help Foundation were present at the event.

There were several guests present for the program. Santosh Rokade (Superintendent, Public Construction Board), Dr Ravindranath Chawan (Dean- Chhatrapati Sambhaji Maharaj Government Medical College) along with other notable dignitaries.

Updates of Baby Feeding Centres

Child Help Foundation volunteers visited Baby Feeding Centres throughout February to inspect the quality of the centres. Centres at Kalyan Railway Station, Kurla Railway Station, Cama Hospital, Sir JJ Hospital, Urban Health Centre, Sir Atalbihari Vajpayee College and Pune Railway Station from Maharashtra were found to be well-maintained. Child Help Foundation also got appreciation letters from Palghar and Boisar Railway Station for installing Baby Feeding Centres. Additionally, three centres in Kerala namely General Hospital, Lakeshore Hospital and Chottanikkara Temple were also found to be well-maintained. Other centres like Andhra Pradesh's Vizag Railway Station, Karnataka's CV Raman Hospital, Bihar's Katihar Railway Station, Tamil Nadu's Institute for Child Health & Hospital for Children and Institute of Obstetrics and Gynecology were found to be well-utilized. However, Maharashtra's Kashimira Police Station had to transfer a lady police officer in charge of the Baby Feeding Centre which has impacted the usage of the said centre and the sofa at the centre at West Bengal's New Jalpaiguri Railway Station was found to be in miserable condition.

All the BFCs are functioning well. The utilization is good and looked after well by the hospital staff, the railway staff, and other caretakers.
